VORTEX OPS

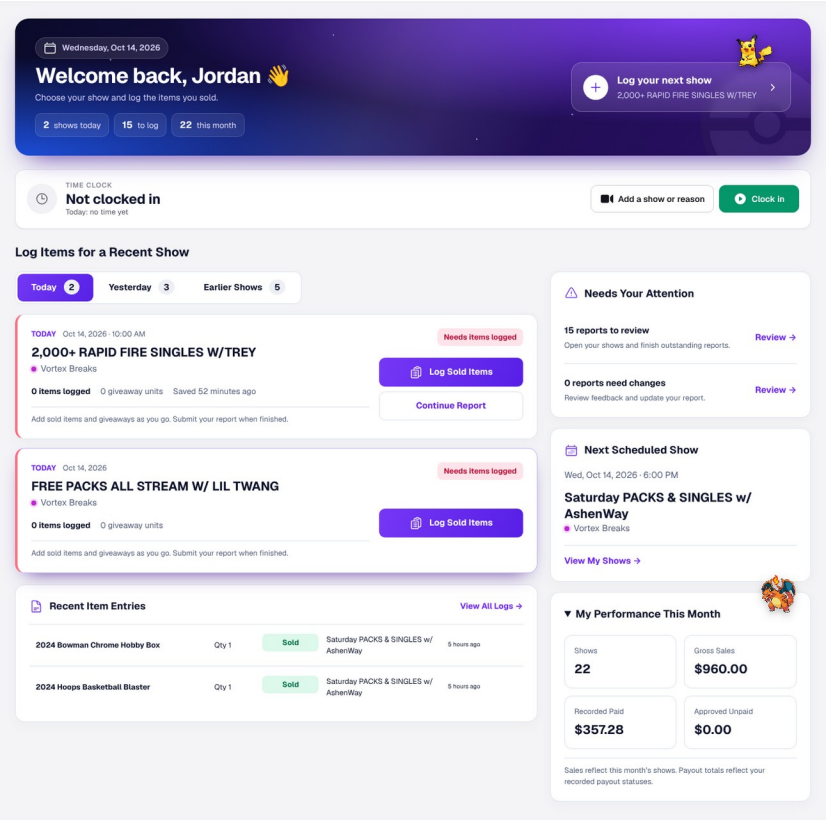

Streamer Guide

Your home page, the time clock, and logging a show from start to submit.

Start here: vortexops.tech • Sign in with your streamer account.

1. Your home page

After signing in you land on My Dashboard. The banner has your counts and Log your next show; the time clock sits right under it.

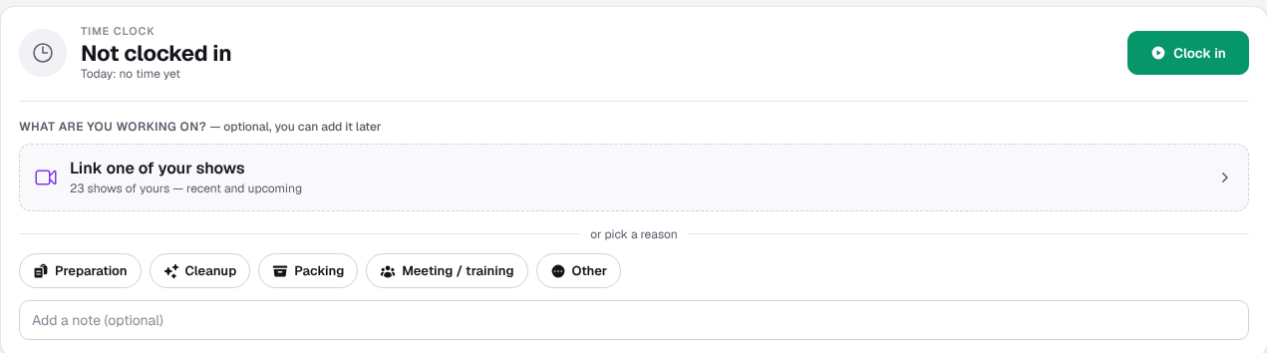

My Dashboard: your counts, Log your next show, the time clock, shows to log, what needs you, and your month.

- **Log your next show** - opens the next report that still needs items.
- **Today / Yesterday / Earlier Shows** - shows that still need items. Log Sold Items opens the report; Continue Report picks up where you left off.
- **Needs Your Attention** - reports to finish, and any sent back for changes.
- **Next Scheduled Show / My Performance This Month** - your next show, and your shows, sales and pay this month.

2. Clock in and out

Your Hours Worked come from the clock and your show reports.

Click Add a show or reason on the time clock to say what you are working on, then Clock in. Both are optional - you can add them later.

The time clock opened: link one of your shows, or pick a reason, and add a note if you like.

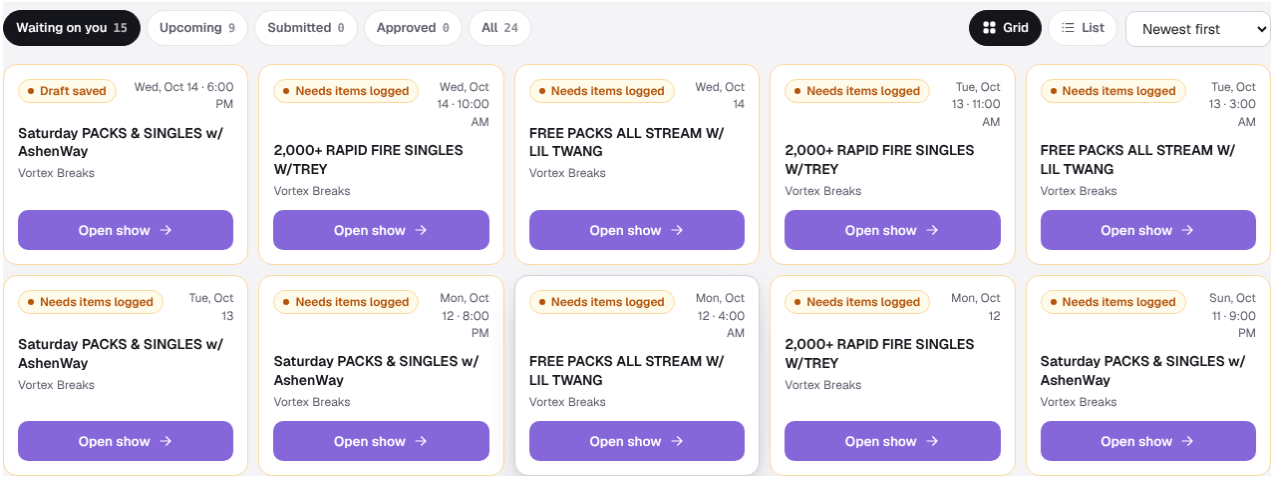

- **Link one of your shows** - time on a show is paid as that show's Hours Worked.
- **Or pick a reason** - Preparation, Cleanup, Packing, Meeting / training or Other.
- **Clock out** - when you finish. While you are clocked in, a reminder bar follows you on every page.
- **Forgot to clock?** - open Timekeeping and use Add missed time. An admin checks it before payroll.

PAYROLL PAYS HOURS WORKED

Pay uses the Hours worked on your show report, or your clock time linked to the show - never the Whatnot stream length.

3. Find the show you need to log

Your shows, filtered by stage.

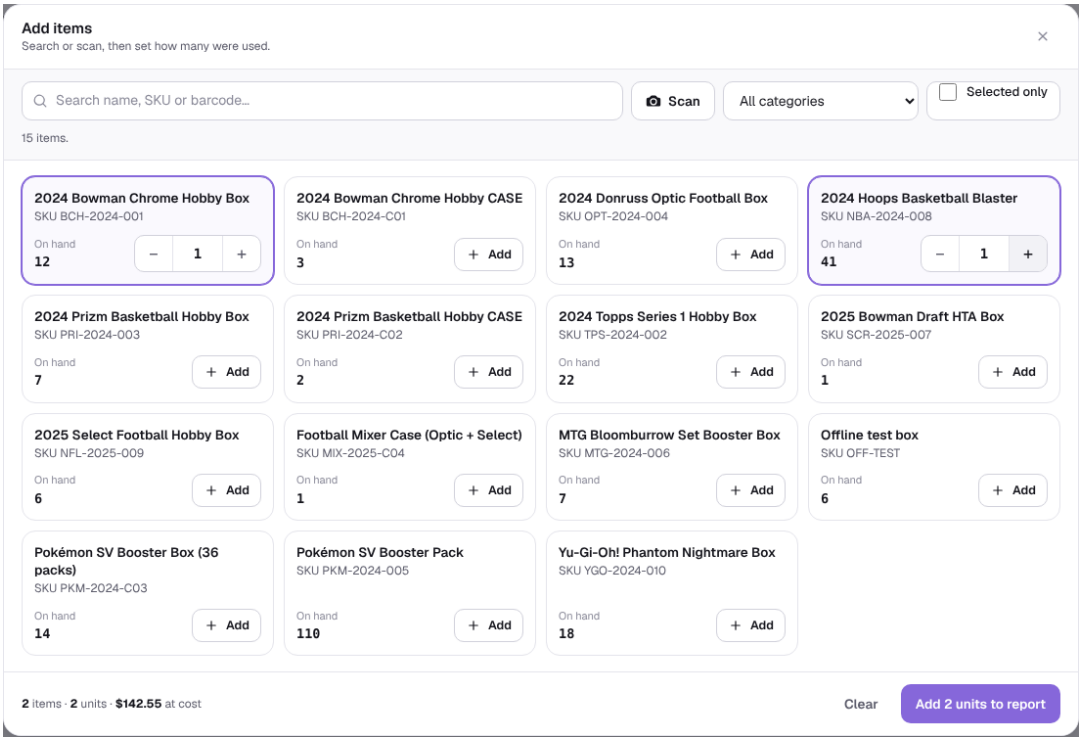

Scroll down My Shows for every show you were on. Waiting on you shows reports that still need you.

- **Waiting on you** - reports that need items logged or finishing.
- **Upcoming** / **Submitted** / **Approved** / **All** - future shows, reports sent for review, approved reports, and everything.
- **Open show** - opens the show's report. Past shows open the same way, so you can see the details and add items later.
- **Grid** / **List** / **Newest first** - change how the list looks and is sorted.

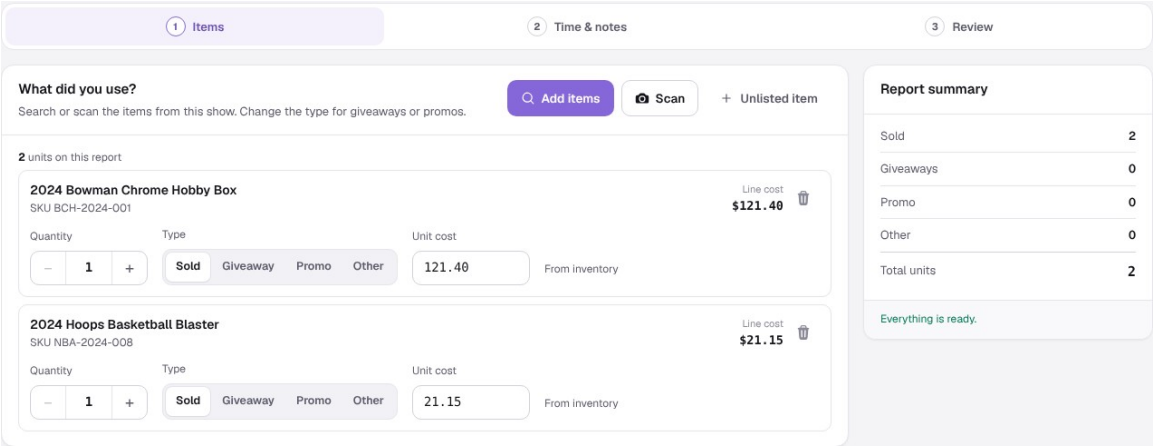

4. Add the inventory used in the show

Step 1 of the report: Items.

Click Add items to open the inventory picker. Search by name, SKU or barcode, Scan with your camera, or narrow by category. Click Add on a product and set the quantity with – and +. Pick several, then click Add units to report.

Inventory picker: selected items show a quantity control; the button at the bottom adds them all.

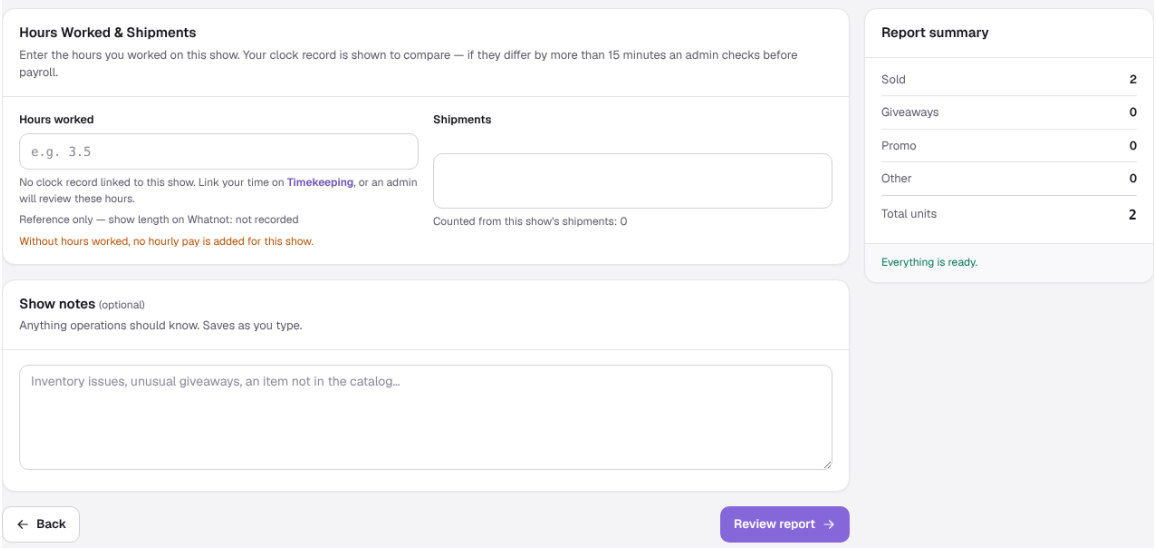

Back on the report, choose each item's type - Sold, Giveaway, Promo or Other - and check the quantity.

Unlisted item adds something that is not in the catalog. Whatnot figures are for reference; you don't need to match each Whatnot order one by one. The draft saves as you work - look for Saved at the top.

5. Enter hours, shipments and notes

Step 2 of the report: Time & notes.

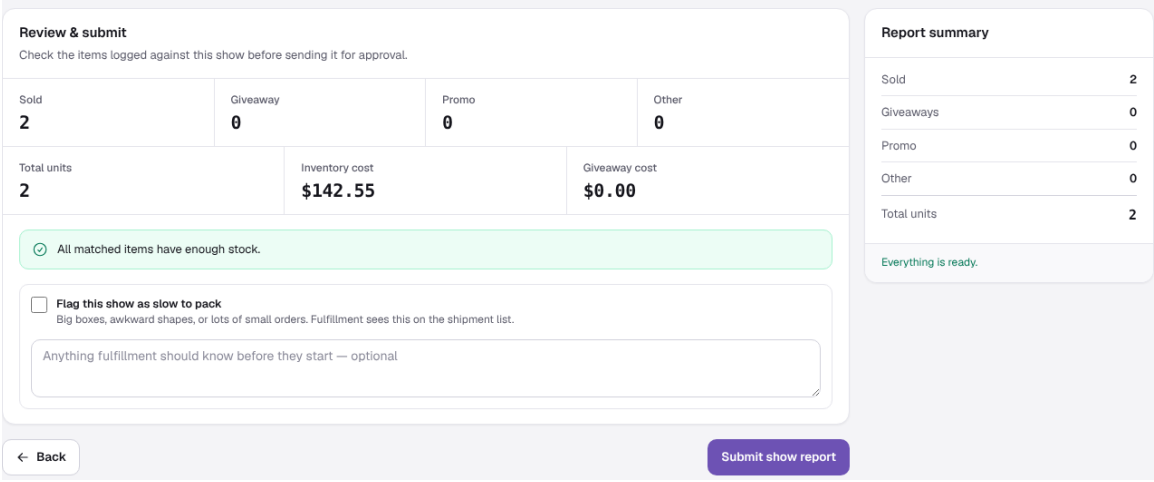

Time & notes: Hours worked (with your clock time to compare), Shipments, and Show notes.

- **Hours worked** - the hours you worked on this show. Your clock record is shown beside it; if they differ by more than 15 minutes an admin checks before payroll.
- **Shipments** - counted from the show's shipments; correct it if needed.
- **Show notes** - inventory issues, unusual giveaways, an item not in the catalog, anything operations should know.

6. Review and submit

Step 3 of the report: Review.

Review & submit: totals by type, inventory cost and a stock check, plus the slow-to-pack flag.

Check items, quantities, types and hours. If the show will be slow to pack (big boxes, awkward shapes, lots of small orders), tick Flag this show as slow to pack and say why. Then click Submit show report.

SUBMITTED REPORTS ARE LOCKED

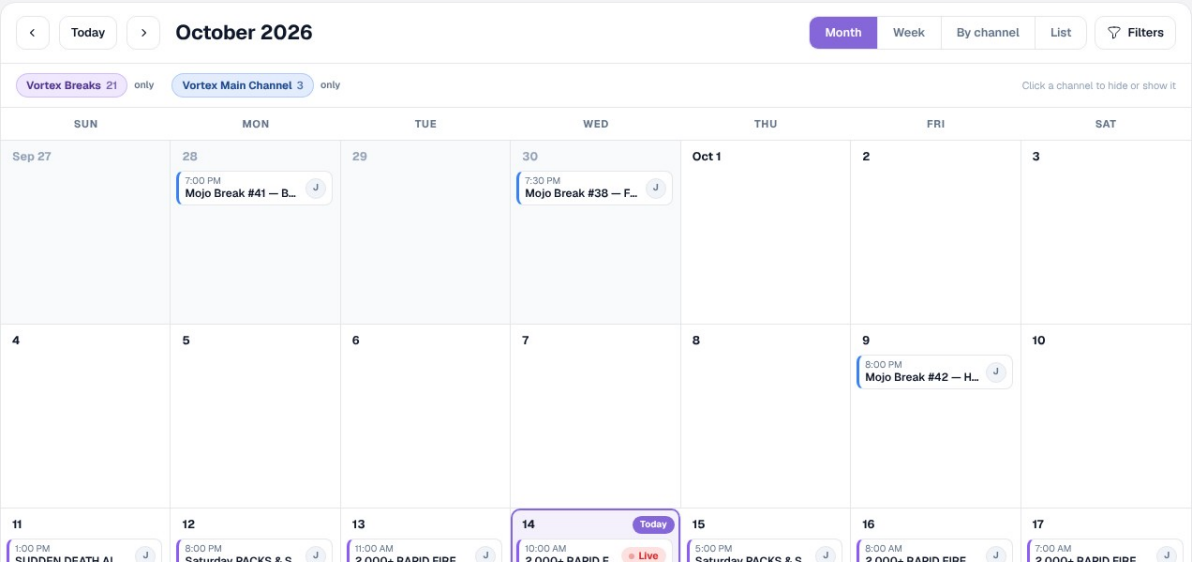

Once submitted, a report can't be edited directly. Double-check sold versus giveaway counts and your hours first.

Need to correct a submitted report?

Open the report and choose Need to change something? An admin is notified. The report stays locked until an admin reopens it.

7. Calendar and checklist

See your shows by date, and check before you submit.

View calendar (Quick actions): your shows by month, week, channel or as a list. Click a show to open it.

Before you submit

CHECK	
Correct show and date	☐
All inventory used has been added	☐
Quantities and types (Sold, Giveaway, Promo, Other) are right	☐
Hours worked are right, and you clocked out	☐
Fulfillment concerns and show notes are included	☐
