VORTEX OPS

Admin Quick Guide

Users • Shows • Payroll • Payment Structures • Admin Workflows

PURPOSE

A practical reference for onboarding streamers, matching shows, resolving payroll blockers, reviewing weekly pay runs, and safely testing compensation changes.

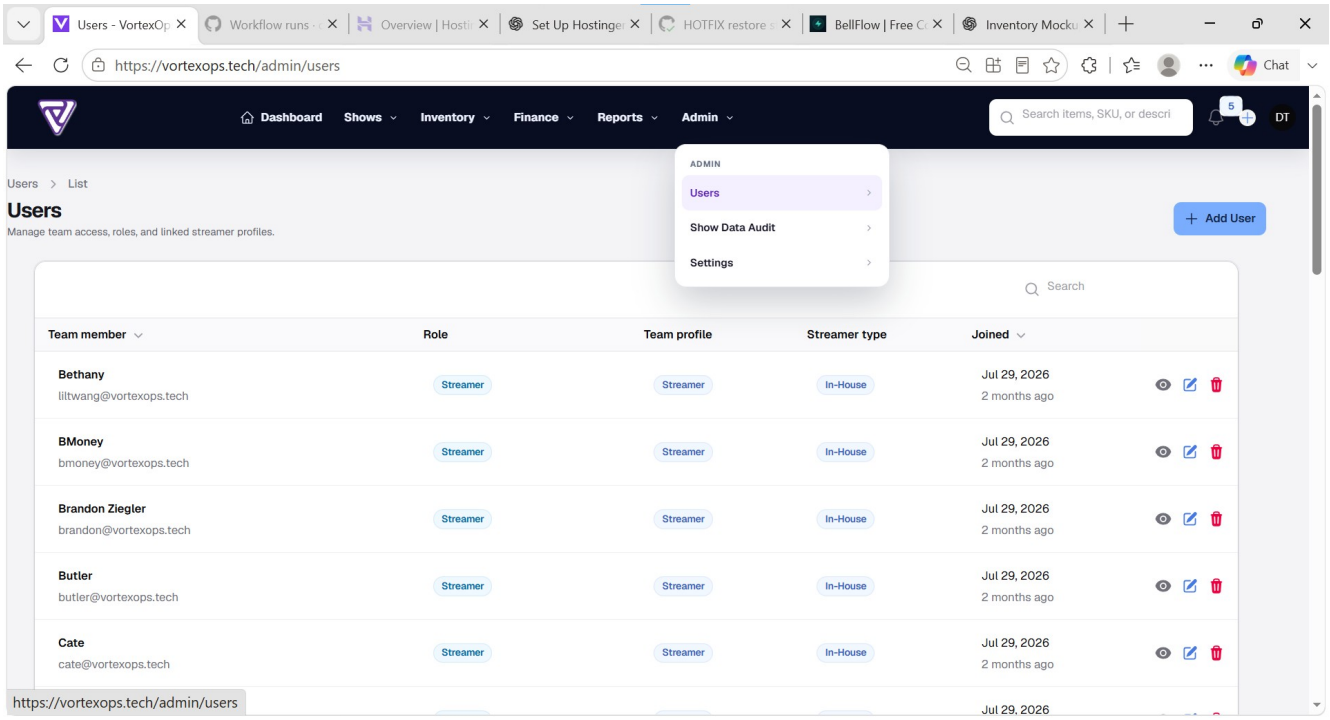

USERS	Identity, access, streamer type & aliases
SHOWS	Schedule, assignment & show follow-up
PAYROLL	Readiness, compensation, pay runs & history

1. Users

Create accounts, assign access, and maintain streamer matching information.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/users	**Admin → Users**

The Users page contains everyone who has access to Vortex Ops. Admins can create or edit accounts, assign roles, choose streamer type, and maintain aliases used for show matching.

Users: create an account or open an existing user to edit access and streamer settings.

Create or edit a user

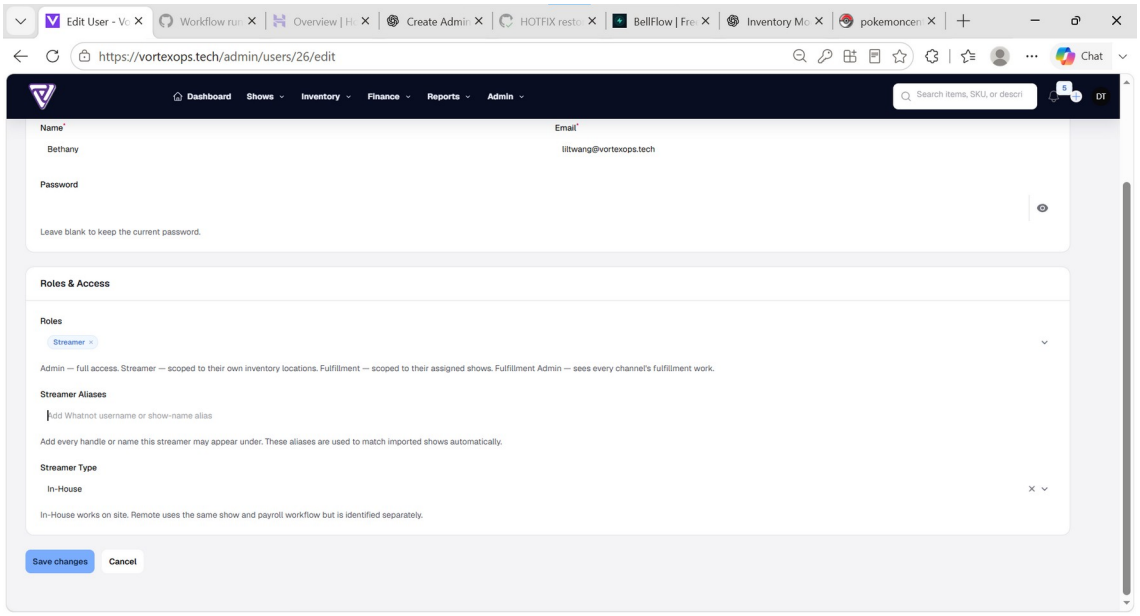

- Select + Add User to create a new account and enter the person's name, email, password, and role.
- Use Edit on an existing user to update access or streamer settings.
- When editing an existing user, leave Password blank to keep the current password.

Roles & access

- Admin - full administrative access.
- Streamer - streamer-facing access scoped to the appropriate workflow.
- Fulfillment - access for assigned fulfillment work.
- Fulfillment Admin - broader fulfillment access across channels/work.

2. Streamer Setup & Aliases

Finish the streamer profile so imported shows can match correctly.

User editor: choose streamer type and add the names or handles that identify this streamer.

Streamer type

Choose In-House or Remote. Both use the same general show and payroll workflow; the type identifies how the streamer works.

Streamer aliases

Add Whatnot usernames, show-name variations, or recurring title wording that identifies the streamer. Type an alias and use Add alias, Enter, or Tab, then save changes.

WHY ALIASES MATTER

If the same title or handle repeatedly appears in Unassigned Shows, add that wording to the user's aliases. This reduces repetitive manual matching.

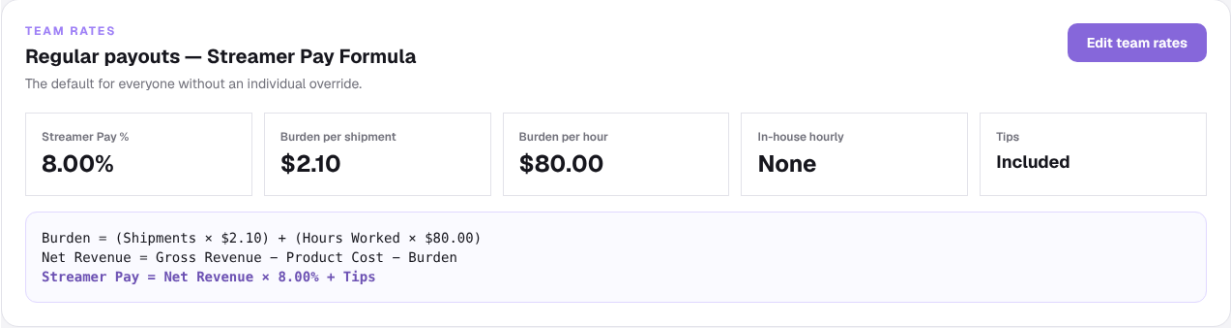

New streamer setup checklist

STEP	ACTION	WHAT TO DO
1	Create User	Admin → Users → + Add User
2	Assign Role	Choose Streamer and any other appropriate access.
3	Set Type	Choose In-House or Remote.
4	Add Aliases	Enter Whatnot usernames/show-name variations.
5	Check Pay	Confirm the standard rate or create an override.
6	Test Payroll	Use Payroll Simulator before real payroll.

3. Payment Structures

Rates & Adjustments: team rates, pay run types and person-specific overrides.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payment-structures	**Payroll → Payment Structures**

Team rates: the standard formula everyone is paid on unless they have an individual override.

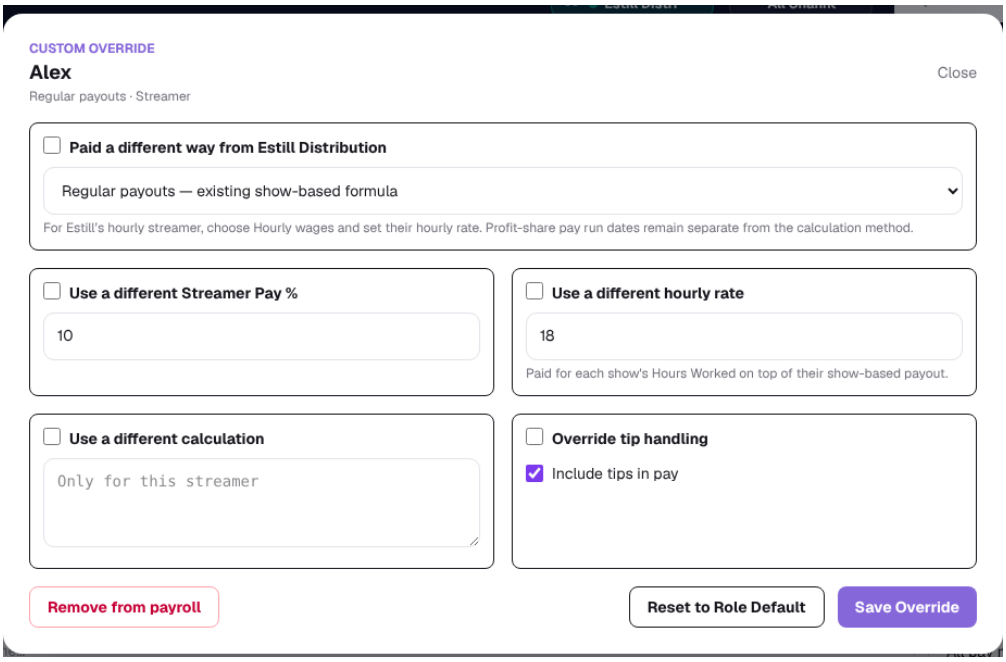

SETTING	CURRENT EXAMPLE SHOWN
Streamer Pay %	8%
Burden per shipment	$2.10
Burden per hour	$80.00
In-house hourly	None (paid to in-house streamers for each show's hours)
Tips	Included

How payroll is calculated

- Product Cost = Inventory Cost × Quantity Sold
- Burden = (Shipments × $2.10) + (Hours Worked × $80.00)
- Net Revenue = Gross Revenue - Product Cost - Burden
- Streamer Pay = Net Revenue × Pay % + Tips

Click Edit team rates to change them in a pop-up (see chapter 18). The same page holds Pay run types (chapter 17) and the Individual Overrides list.

Individual overrides

Click Edit on a person's row. Tick only what differs for them, then Save Override.

- **Paid a different way** - gives one person their own pay method instead of their business's.
- **Use a different Streamer Pay %** - when one person has a different rate.
- **Use a different hourly rate** - paid for each show's Hours Worked on top of their show-based pay.
- **Use a different calculation** - only when that person's compensation method differs.
- **Override tip handling** - when tips should be treated differently.
- **Reset to Role Default** - removes the person's custom override. Remove from payroll archives someone who has left.

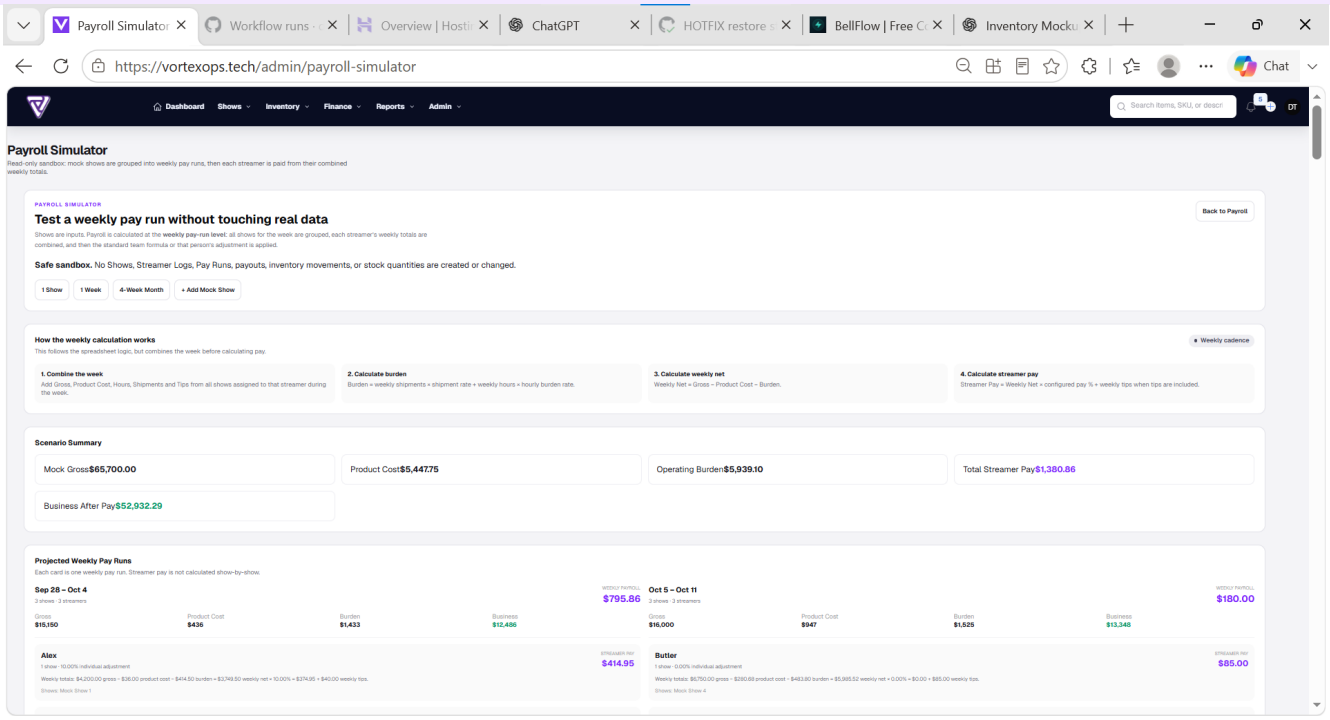

4. Payroll Simulator

Test compensation changes without touching real operational data.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payroll-simulator	**Finance → Payroll Simulator**

SAFE SANDBOX

The simulator does not create or change real shows, streamer logs, pay runs, payouts, inventory movements, or stock quantities.

Payroll Simulator: use quick scenarios, then review the modeled weekly results.

Quick scenarios

Use 1 Show, 1 Week, or 4-Week Month for a quick test. Use + Add Mock Show when you want to build a custom scenario.

Read the results

- Mock Gross - total simulated revenue.
- Product Cost - simulated cost of products used.
- Operating Burden - shipment and hourly burden.
- Total Streamer Pay - calculated streamer compensation.
- Business After Pay - modeled amount remaining after costs and streamer pay.

Mock show inputs

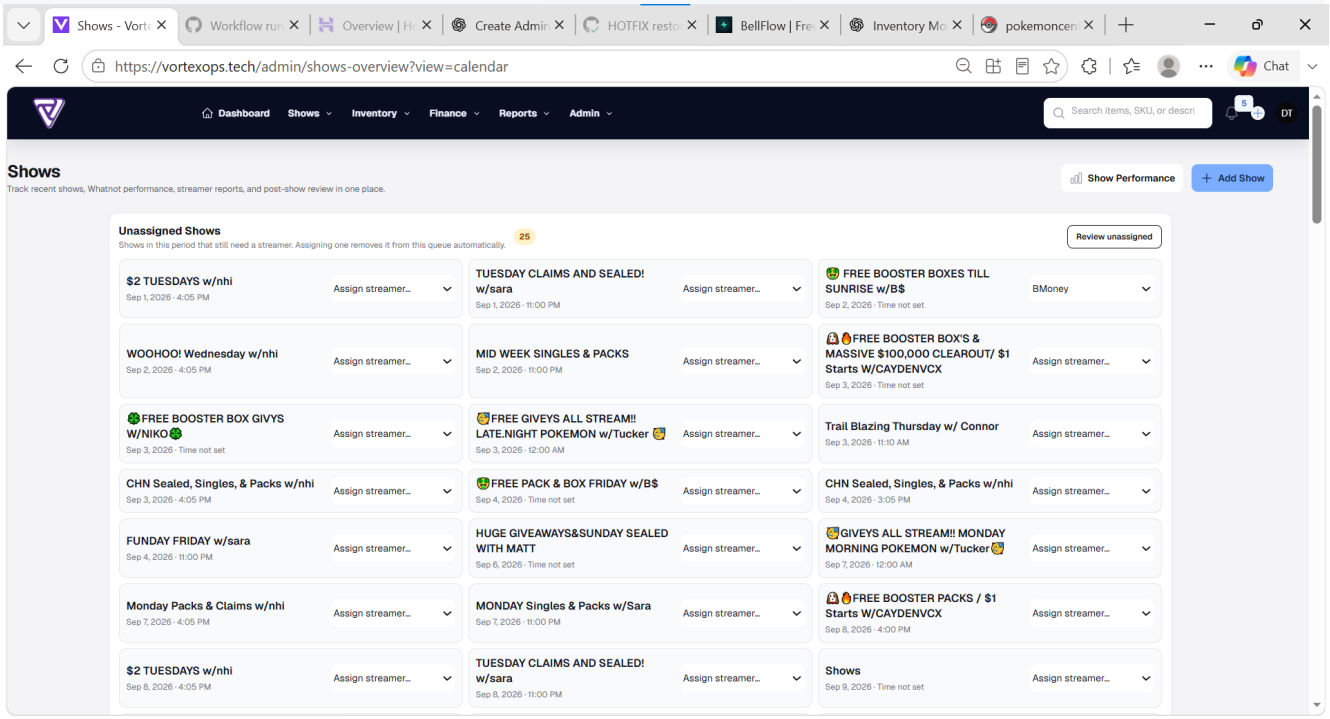

Open Mock Show Inputs only when you need to change the assumptions: show date, streamer, gross sales, hours, shipments, tips, products, and quantities.

5. Shows Overview

The main workspace for schedule visibility, streamer assignment, and show follow-up.

DIRECT LINK
vortexops.tech/admin/shows-overview

NAVIGATION
Shows → Shows Overview

Unassigned Shows: full titles are visible and admins can assign a streamer directly from the queue.

Unassigned Shows

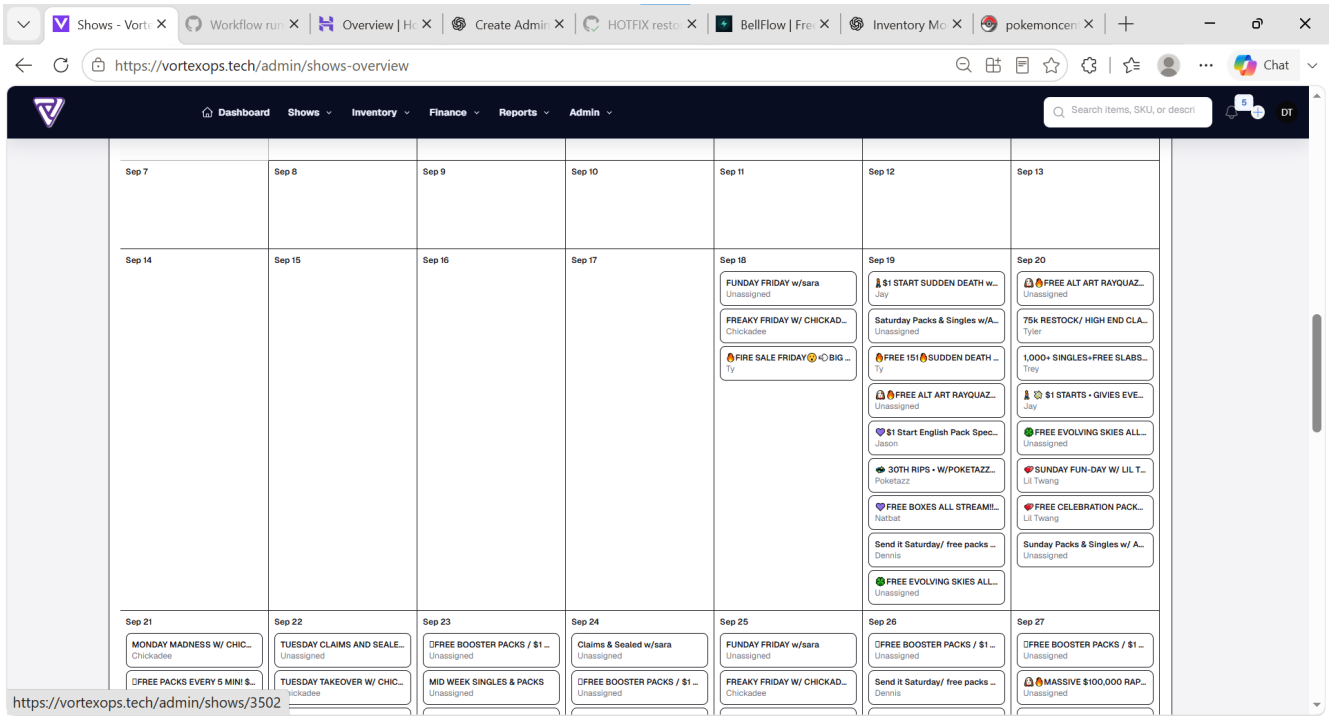

- Choose the correct streamer directly from the assignment control.
- The assignment saves immediately; once assigned, the show leaves the Unassigned Shows queue.
- If the same title or handle appears repeatedly, add it as a Streamer Alias under Admin → Users.
- Use Review unassigned when you want to focus only on unresolved show-to-streamer matching.

Calendar and Cards

Calendar is the default view and is best for schedule visibility. Switch to Cards when you want more operational detail such as streamer, workflow status, gross/net information, and show actions.

6. Working Shows by Date

Use the view that matches the task you are doing.

Calendar view: review the month visually and spot assigned or unassigned shows by date.

Calendar view - default

- Best for understanding the schedule at a glance.
- Use it to spot busy days, missing assignments, and where shows fall in the month.
- Open a show when you need more detail or follow-up.

Cards view

- Best for day-to-day operational cleanup.
- Shows are paginated instead of presented as one long table.
- Each card surfaces schedule, workflow, streamer, gross/net, and View/Edit actions.
- Admins can assign an unassigned show directly from the card.

MATCHING TIP

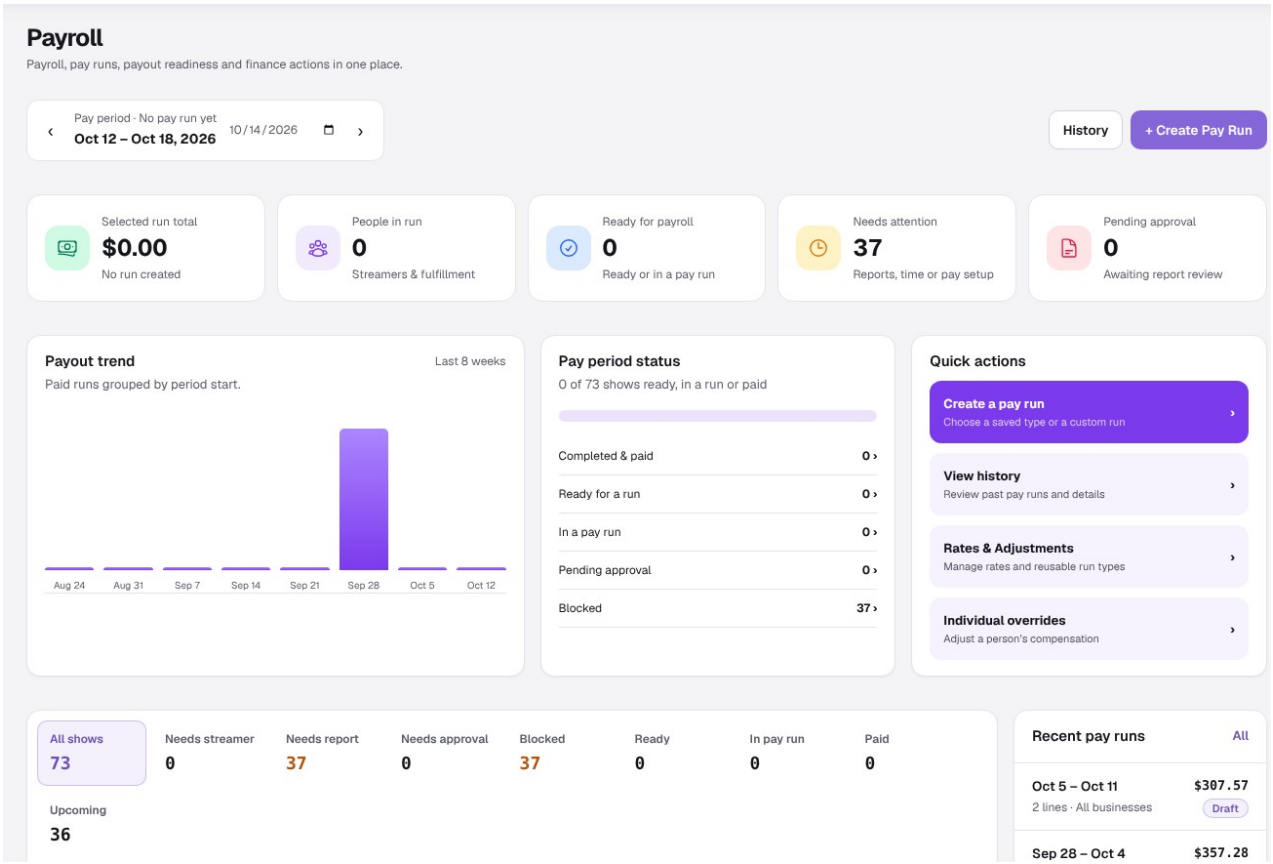

A good alias should be a recurring name, handle, or title pattern that clearly identifies one streamer. Avoid overly broad wording that could match multiple people.

7. Payroll Overview

The command center for the pay period you pick.

DIRECT LINK
vortexops.tech/admin/payroll-overview

NAVIGATION
Payroll → Payroll Overview

Payroll Overview: the period, its run, what is ready or blocked, recent payouts and quick actions.

What to look at first

- **Pay period** - move with the arrows or pick a date. The cards follow the period you choose.
- **Needs attention** - shows waiting on a report, hours or pay setup - clear these before finalizing.
- **Pending approval** - reports waiting for an admin's review.
- **Ready for payroll** - shows ready, or already in a pay run.
- **Pay period status** - the period's shows by stage: completed & paid, ready, in a run, pending, blocked.
- **Quick actions** - Create a pay run, View history, Rates & Adjustments, Individual overrides.

WORK THE EXCEPTIONS FIRST

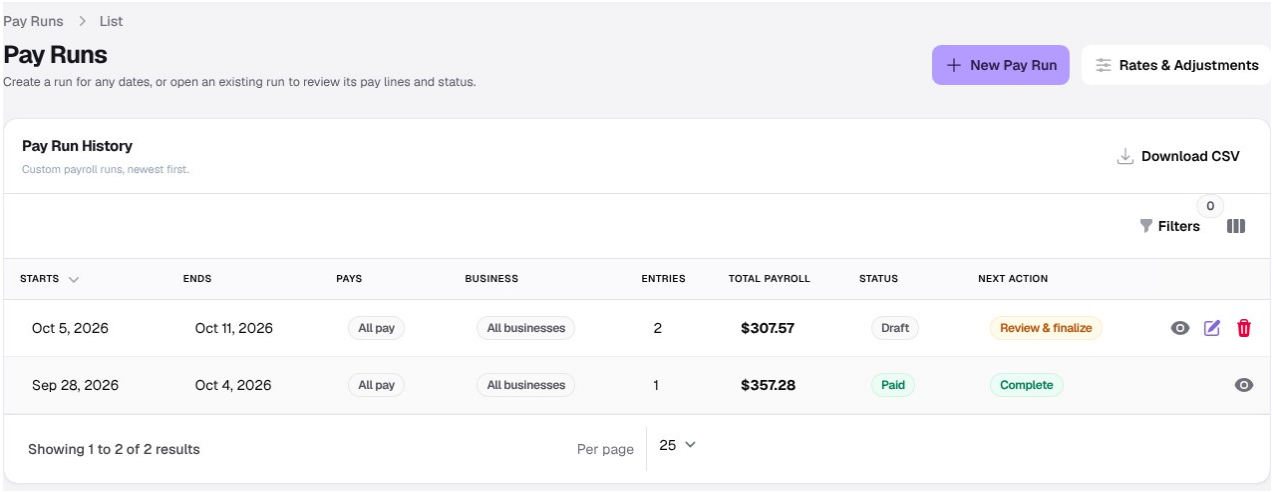

Below the cards, the show list filters by stage (Needs report, Blocked, Ready, In pay run, Paid). Open each blocked show and clear it before finalizing the run.

8. Pay Runs & Pay Run History

Every run, for any dates, and the workspace for one run.

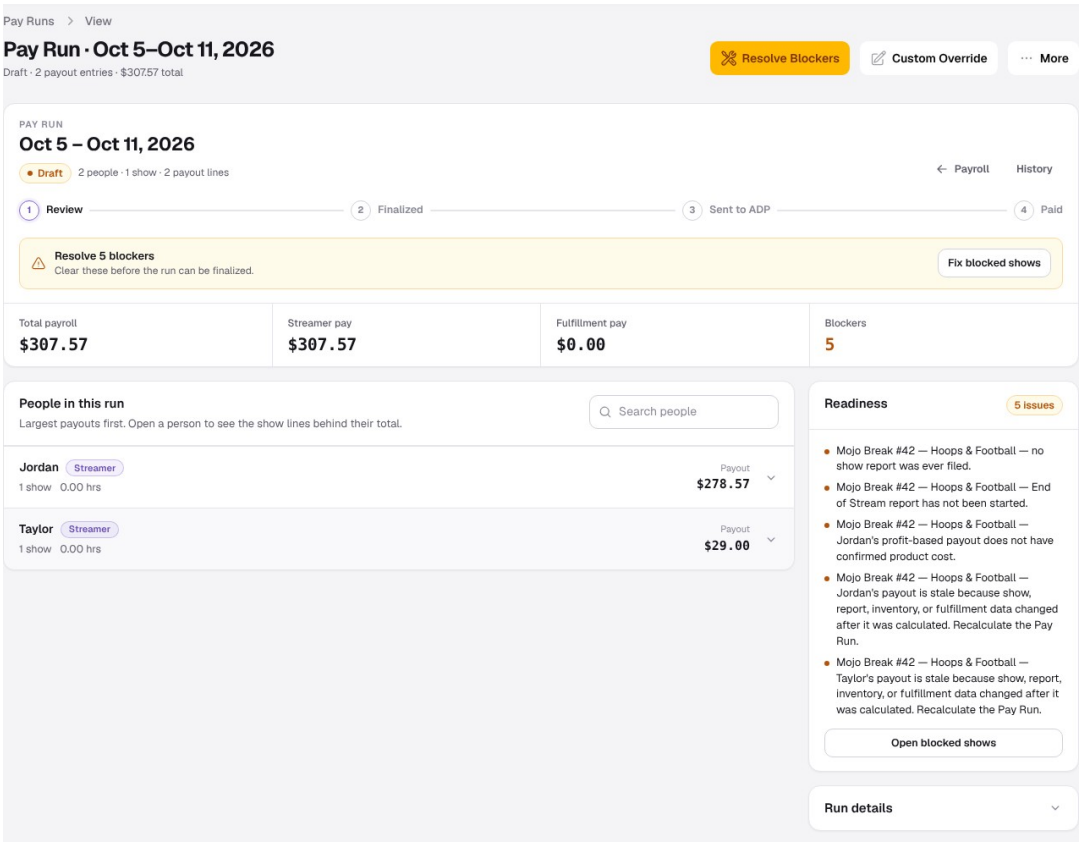

DIRECT LINK
vortexops.tech/admin/weekly-payout-batches

NAVIGATION
Payroll → Pay Run History

Pay Runs: each run's dates, what it pays, business, entries, total, status and next action.

- **Starts / Ends** - the period the run covers - any dates, not only a week.
- **Pays** - All pay, Wages or Profit share.
- **Business** - whose people the run pays.
- **Status / Next action** - where the run is, and what moves it forward (e.g. Review & finalize).
- **New Pay Run** - creates a run (chapter 17). Rates & Adjustments opens Payment Structures.

A pay run: Review → Finalized → Sent to ADP → Paid, the totals, people in the run, and readiness blockers.

Open a run to review it: people are listed largest payout first; open a person to see the show lines behind their total. Readiness blockers must be cleared before the run can be finalized.

9. How the Payroll Pieces Fit Together

A simple end-to-end view of the admin workflow.

STEP	AREA	PURPOSE
1	Shows	Shows are imported/scheduled and assigned to the correct streamer.
2	Streamer workflow	Completed shows receive required streamer/end-of-stream information.
3	Payroll Overview	Admins resolve missing logs, reviews, assignments, and other blockers.
4	Payment Structures	The standard formula or individual override determines compensation.
5	Pay Run	Eligible shows are grouped into the weekly pay run.
6	Review & finalize	The weekly batch is reviewed before export/payment.
7	History	Past pay runs remain available for reference.

CURRENT WORKING FLOW

Assign the show → complete/review show data → clear payroll blockers → calculate with the configured payment structure → include in the weekly pay run → review and finalize.

Day-to-day admin workflow

- Check Shows Overview for unassigned shows and assign them to the correct streamer.
- Add aliases when a recurring title or handle should auto-match in the future.
- Use Calendar for schedule visibility and Cards for operational cleanup.
- Check Payroll Overview for Needs Log, Needs Review, and other blockers.
- Resolve completed-show exceptions before finalizing the week's payroll.
- Review the weekly Pay Run, confirm entries/totals, then finalize/export when ready.
- Use Payroll Simulator whenever you want to test a compensation change without touching real data.

10. What Do I Do When...?

Quick reference for the most common admin situations.

SITUATION	GO HERE	ACTION
A show has no streamer	**Shows Overview**	Assign the correct streamer.
The same streamer keeps appearing unassigned	**Admin → Users**	Add a recurring title/handle as an alias.
A completed show has no streamer log	**Payroll Overview**	Work the Needs Log item.
A show needs admin approval	**Payroll Overview**	Work the Needs Review item.
A streamer has a different pay rate	**Payment Structures**	Create an Individual Override.
You want to test a pay change	**Payroll Simulator**	Run a mock scenario.
The week is ready for payroll	**Payroll Overview**	Confirm readiness and move into the pay run.
You need an old payroll	**Pay Run History**	Open the weekly batch.

SIMPLE RULE
Users = identity & access • Shows = schedule & assignment • Payment Structures = compensation • Payroll Overview = readiness • Pay Runs = weekly payment workflow • Simulator = safe testing

Note: the Shows workflow is still being refined, so screenshots and labels can be updated as the product evolves.

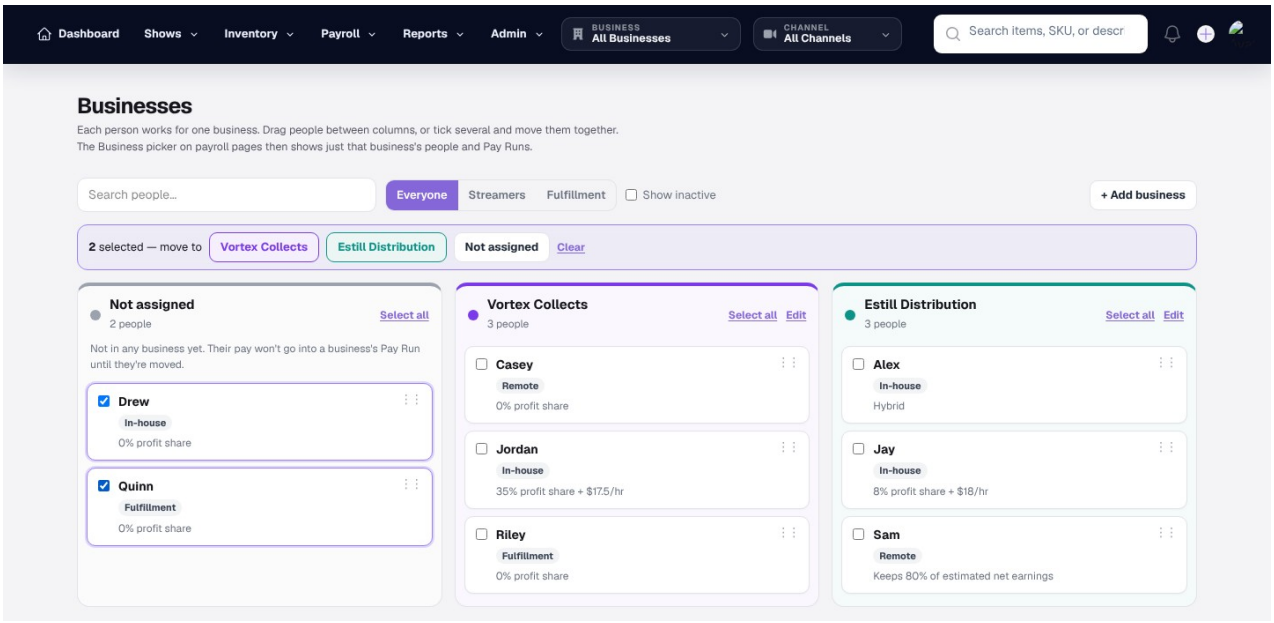

11. Businesses

Vortex Collects and Estill Distribution: who works for which business, and paying each one separately.

DIRECT LINK
vortexops.tech/admin/businesses

NAVIGATION
Payroll → Businesses

Both businesses stream on the same Whatnot channels, but every person works for one of them. Put each person in their business once; from then on their shows, pay rates and weekly Pay Runs belong to that business. Fulfillment admins find this page under Admin → Businesses.

Businesses: a column per business, plus Not assigned. Drag a card, or tick several and use Move to.

Assign people

- **Drag a card** - onto a business column to move that person.
- **Tick several people** - then click a business in the bar above the board - or drag one of the ticked cards and they all move together.
- **Select all** - ticks everyone in a column.
- **Not assigned** - people not in a business yet. Their pay stays out of the business Pay Runs until they are moved.
- **Add business / Edit** - create another business, or rename and recolour one.

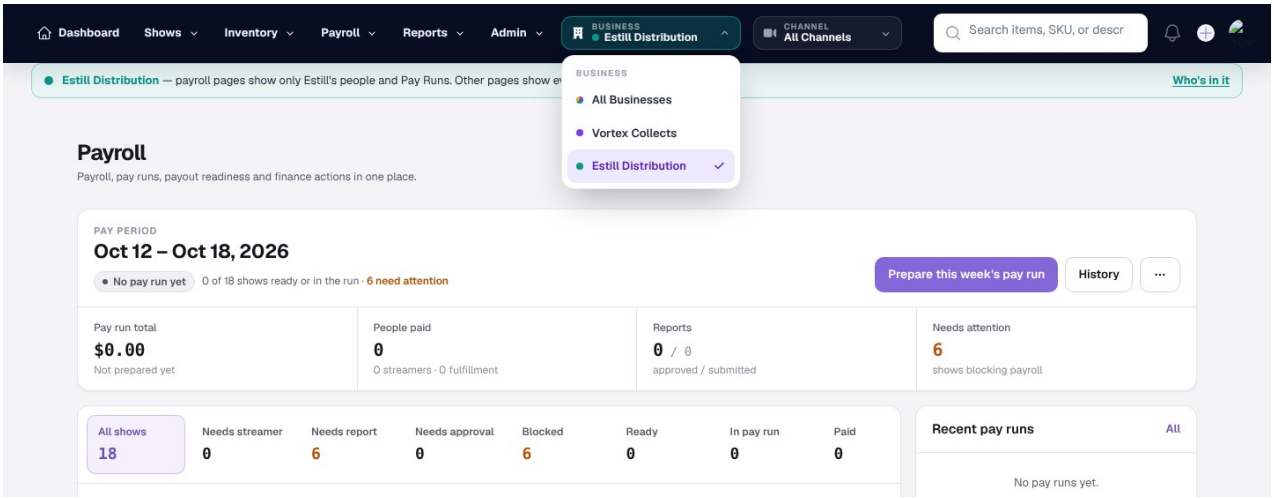

BEFORE ANYONE IS ASSIGNED
Until at least one person is in a business, payroll works exactly as before: one Pay Run per week for everyone.

12. Running Payroll per Business

Pick the business at the top of any payroll page; each business has its own Pay Runs.

DIRECT LINK
vortexops.tech/admin/payroll-overview

NAVIGATION
Payroll → Payroll Overview

The Business picker sits beside the Channel picker on payroll pages. A coloured banner names the business you are viewing.

The Business picker

- Shown only on payroll pages: Payroll Overview, Pay Run History, Payouts, Payment Structures and Businesses.
- Choose a business to see only its people, shows and Pay Runs. Choose All Businesses to see both together.
- The dashboard, shows, reports and inventory always show every business - the picker never filters them.

Separate Pay Runs

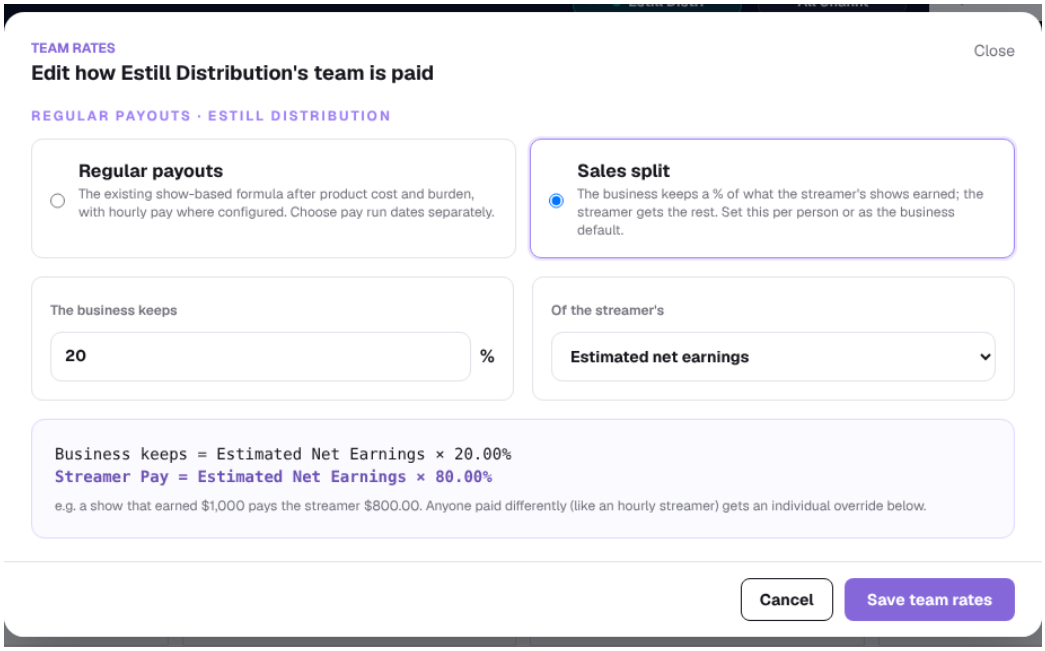

- Each business gets its own weekly Pay Run, so one business can be finalized, submitted and marked paid without touching the other's people.
- **Prepare this week's pay run** - creates the chosen business's run, or one run per business when All Businesses is chosen.
- **Split by business** - on a draft Pay Run made for everyone before businesses were set up - turns it into one run per business.

NOBODY IS PAID TWICE
A run for all businesses and a run for one business cannot cover the same week. If the week already has an all-business draft, split it first.

13. Pay Rates per Business

Vortex Collects pays profit share; Estill Distribution pays a sales split.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payment-structures	**Payroll → Payment Structures**

Edit team rates with Estill Distribution picked: the business keeps 20% of each show's estimated net earnings.

How each business pays

PAY TYPE	HOW IT WORKS
Profit share (Vortex Collects)	Streamer Pay % of the show's profit after product cost and burden, plus hourly for in-house streamers.
Sales split (Estill Distribution)	The business keeps a % of what the streamer's shows earned; the streamer gets the rest.

Set Estill's rates

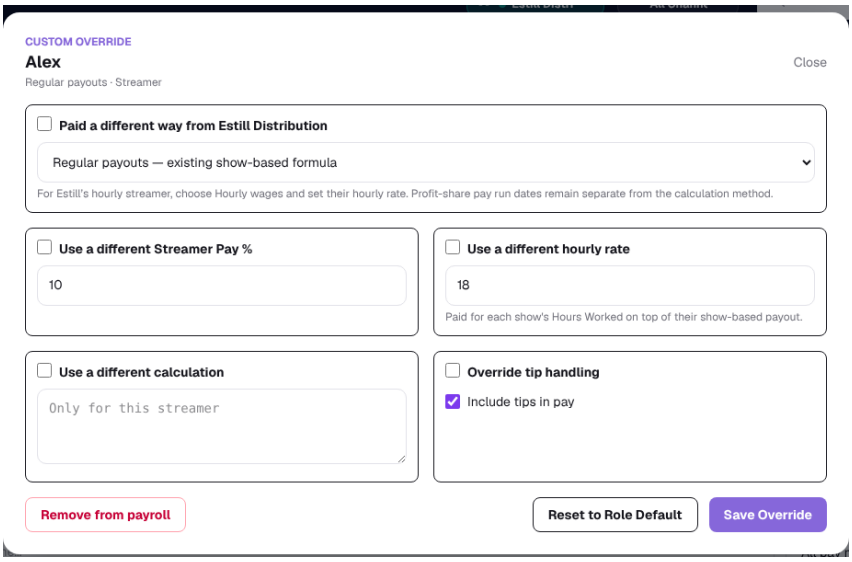

- Pick Estill Distribution in the Business picker, then open Payment Structures.
- Click Edit team rates, choose Sales split and enter the % the business keeps.
- **Of the streamer's** - Estimated net earnings (after Whatnot fees, the default) or Gross sales.
- Save team rates. Example: a show that earned $1,000 with a 20% cut pays the streamer $800.

With All Businesses picked, the page edits the shared rates, which any business uses until it saves its own. Use the shared rates instead drops a business's own rates. Burden rates, the pay schedule and automation are shared by both businesses.

14. Paying One Person Differently

Estill's hourly streamer is paid like a Vortex Collects streamer.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payment-structures	**Payroll → Payment Structures → Individual Overrides**

Individual override pop-up: tick Paid a different way, choose Regular payouts, then set the % and hourly rate.

Set up the hourly Estill streamer

- With Estill Distribution picked, click Edit on the streamer's row under Individual Overrides.
- Tick Paid a different way from Estill Distribution and choose Regular payouts (the show-based profit share formula).
- Tick Use a different Streamer Pay % and Use a different hourly rate, fill them in, then Save Override.
- **Reset to Role Default** - removes the override, so they follow Estill's sales split again.

A person's business and pay can also be set on their user profile (Admin → Users → Edit → Pay). Moving someone to another business changes how they are paid automatically unless they have their own pay type set.

What do I do when...?

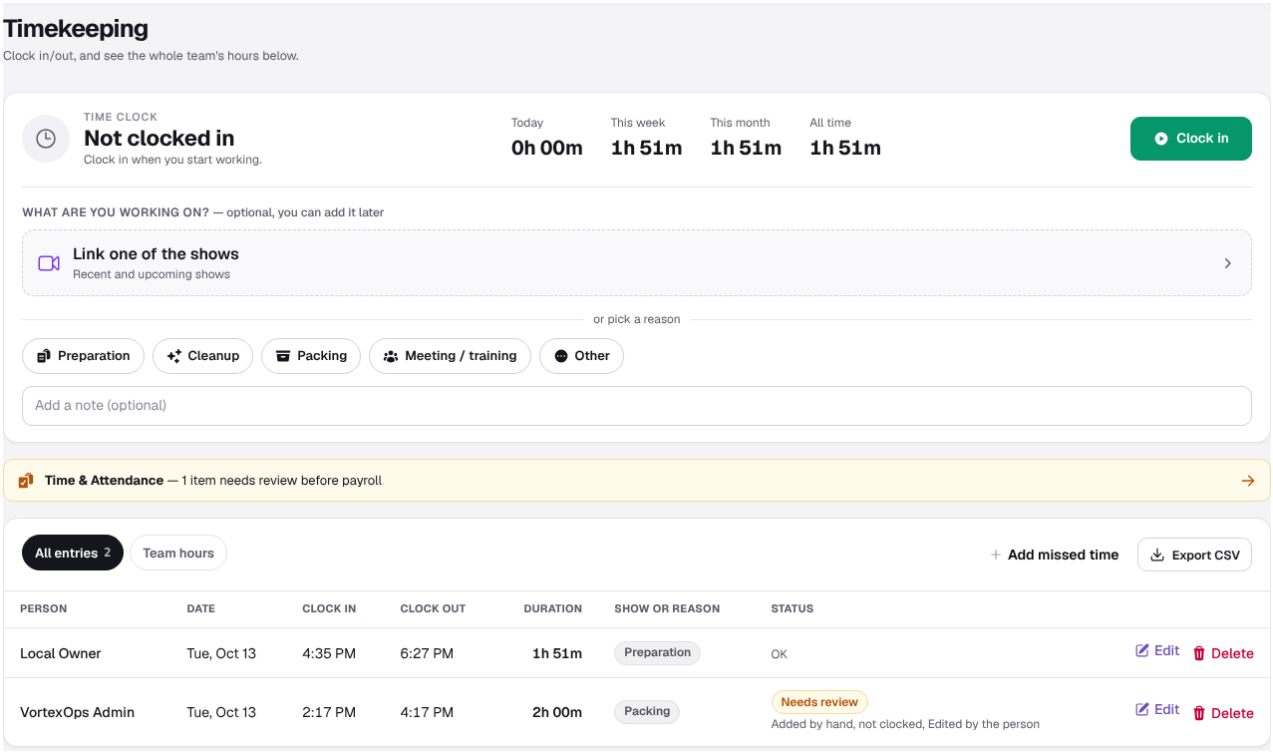

SITUATION	GO HERE	ACTION
Someone's pay is missing from the business Pay Runs	Payroll → Businesses	Move them into their business, then recalculate the Pay Run.
Payroll only shows one business	Business picker	Choose All Businesses.
A business Pay Run overlaps another run	Pay Run History	Open the all-business draft and use Split by business.
An Estill streamer is still paid profit share	Businesses / Payment Structures	Check they are in Estill, Estill is set to Sales split, and they have no pay-type override.

15. Timekeeping

The time clock, everyone's entries, and team hours.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/timekeeping	**Timekeeping → Clock in & my time**

Hourly people clock in and out against a show or a reason. Payroll pays approved Hours Worked - report hours on a show, otherwise the clock time linked to it - and never the Whatnot stream length.

Timekeeping: the clock with your totals, what you are working on, the Time & Attendance bar, and every entry.

Clock in and out

- **Link one of the shows** - the show you are working. Time on a show is paid as that show's Hours Worked.
- **Or pick a reason** - Preparation, Cleanup, Packing, Meeting / training or Other - for time not on a show. Both are optional and can be added later.
- **Clock in / Clock out** - starts and stops the timer. While clocked in, a reminder bar follows you on every page.

Entries and team hours

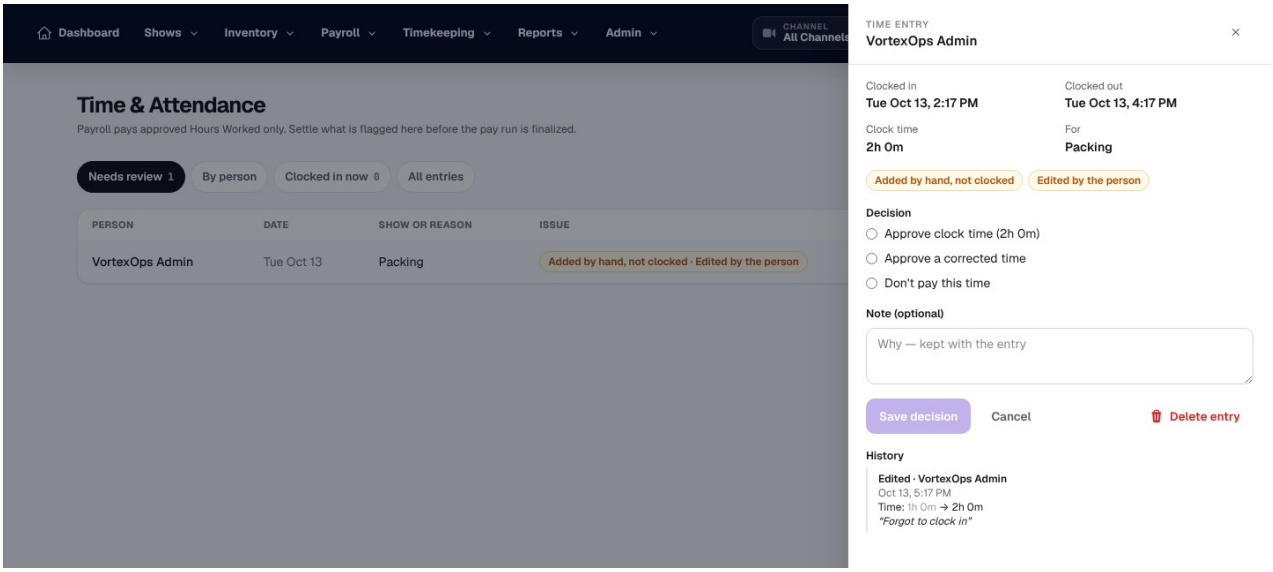

- **All entries** - everyone's time. Edit corrects an entry; Delete removes one (useful while testing).
- **Team hours** - hours per person for this week, last week, the pay period, this month or a custom range.
- **Add missed time** - records a shift someone forgot to clock. It is flagged for review.
- **Export CSV** - downloads what is on screen.

16. Time & Attendance

Settle hours before payroll.

DIRECT LINK
vortexops.tech/admin/time-attendance

NAVIGATION
Timekeeping → Time & Attendance

Click a flagged entry to open it, choose a decision and save.

Anything that needs a decision before payroll lands here: shifts left open, time added by hand or edited, and shows where the report's Hours Worked and the clocked time disagree by more than 15 minutes.

DECISION	WHAT IT DOES
Approve clock time	Pays the time as clocked.
Approve a corrected time	Pays a time you type instead.
Don't pay this time	Keeps the entry but leaves it out of payroll.
Delete entry	Removes an entry made by mistake.

- **Needs review / By person / Clocked in now / All entries** - the tabs across the top.
- **History** - every change to an entry, who made it and why.

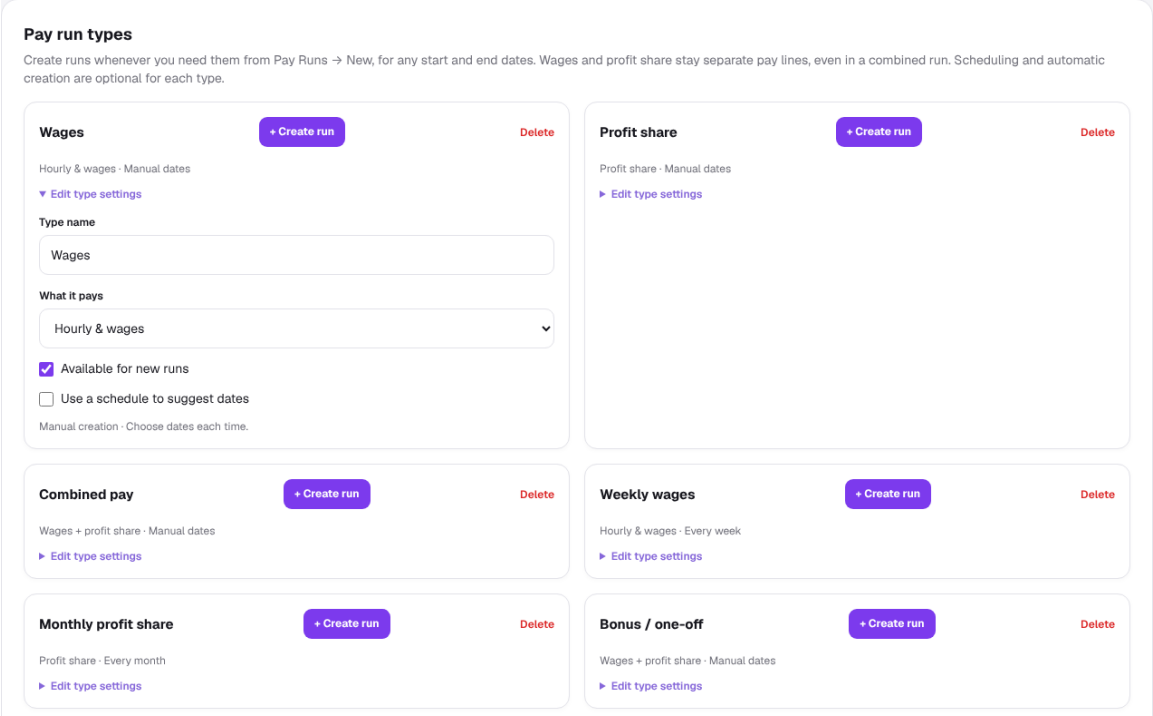

ONLY APPROVED HOURS ARE PAID

A pay run picks up Hours Worked once they are settled. If a show's hours are missing from a run, look here first, then recalculate the run.

17. Pay Run Types and New Pay Runs

Create a pay run whenever you need one, for any dates.

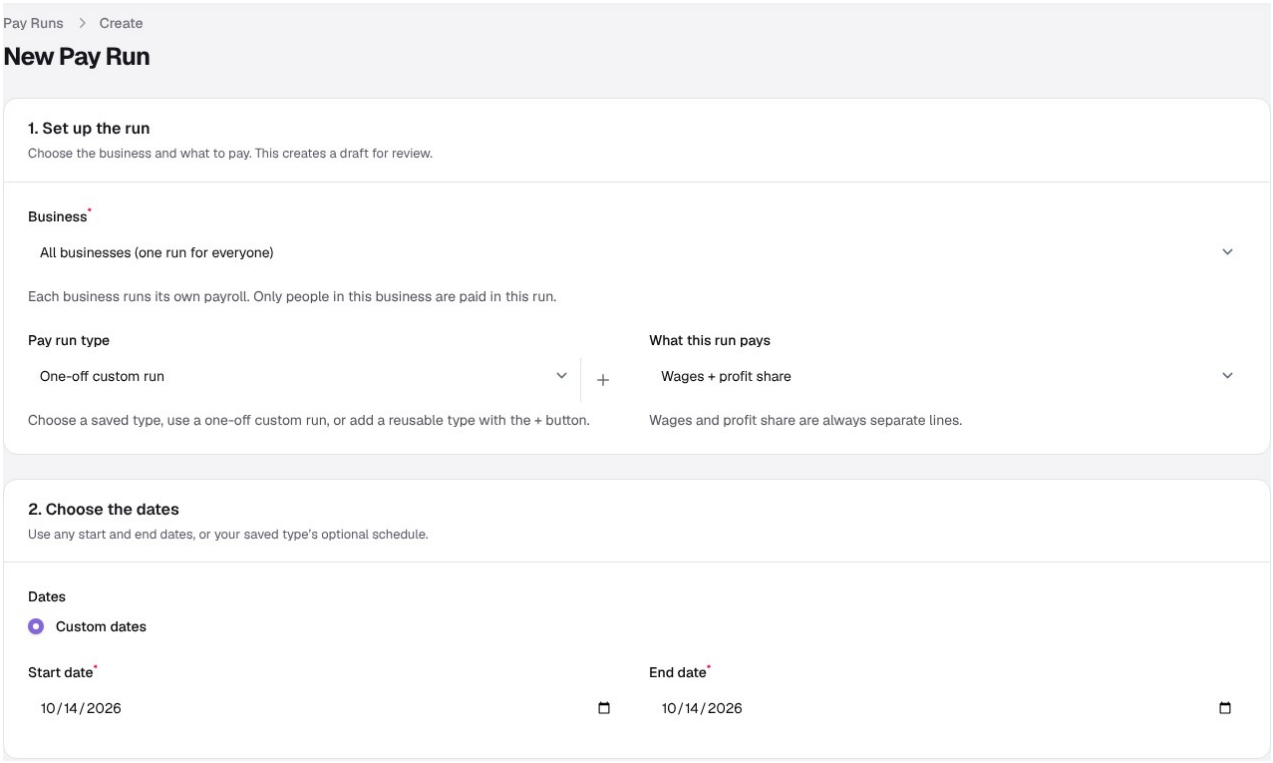

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payment-structures	**Payroll → Payment Structures → Pay run types**

Pay run types: saved recipes for runs. Open Edit type settings to change one.

- **What it pays** - Hourly & wages, Profit share, or Wages + profit share. Wages and profit share are always separate lines, even in a combined run.
- **Use a schedule to suggest dates** - optional - a frequency and start date fill in each run's dates.
- **Automatically create draft runs** - optional - leave it off to create runs yourself. Nothing is ever finalized or paid automatically.
- + **Create run** - starts a run of that type. Delete keeps every run already made with it.

Create a pay run

Payroll → + Create Pay Run: business, type (or a one-off custom run), what it pays, and any dates.

- Pick the Business, then a saved Pay run type or One-off custom run. The + button saves a new reusable type without leaving the page.
- Choose any start and end dates, add a note, and create. The run starts as a draft to review.

NOBODY IS PAID TWICE

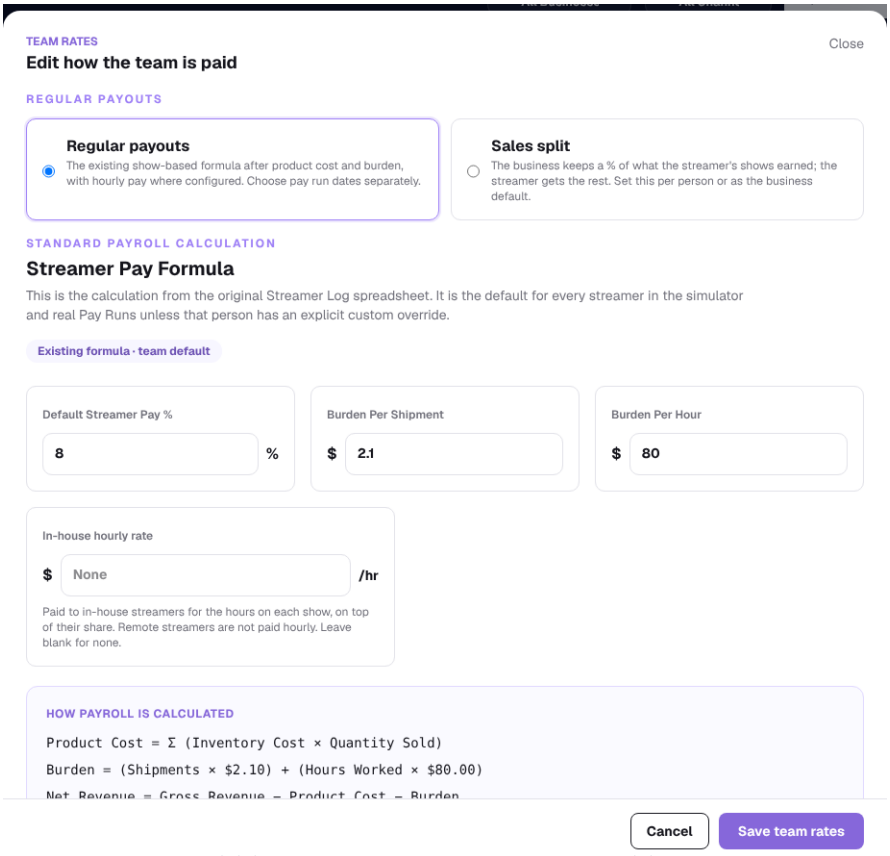

Two runs that pay the same kind of pay cannot cover the same dates.

18. Team Rates and Profit & Loss

Pay settings in a pop-up, and what each period made.

DIRECT LINK
vortexops.tech/admin/payment-structures

NAVIGATION
Payroll → Payment Structures → Edit team rates

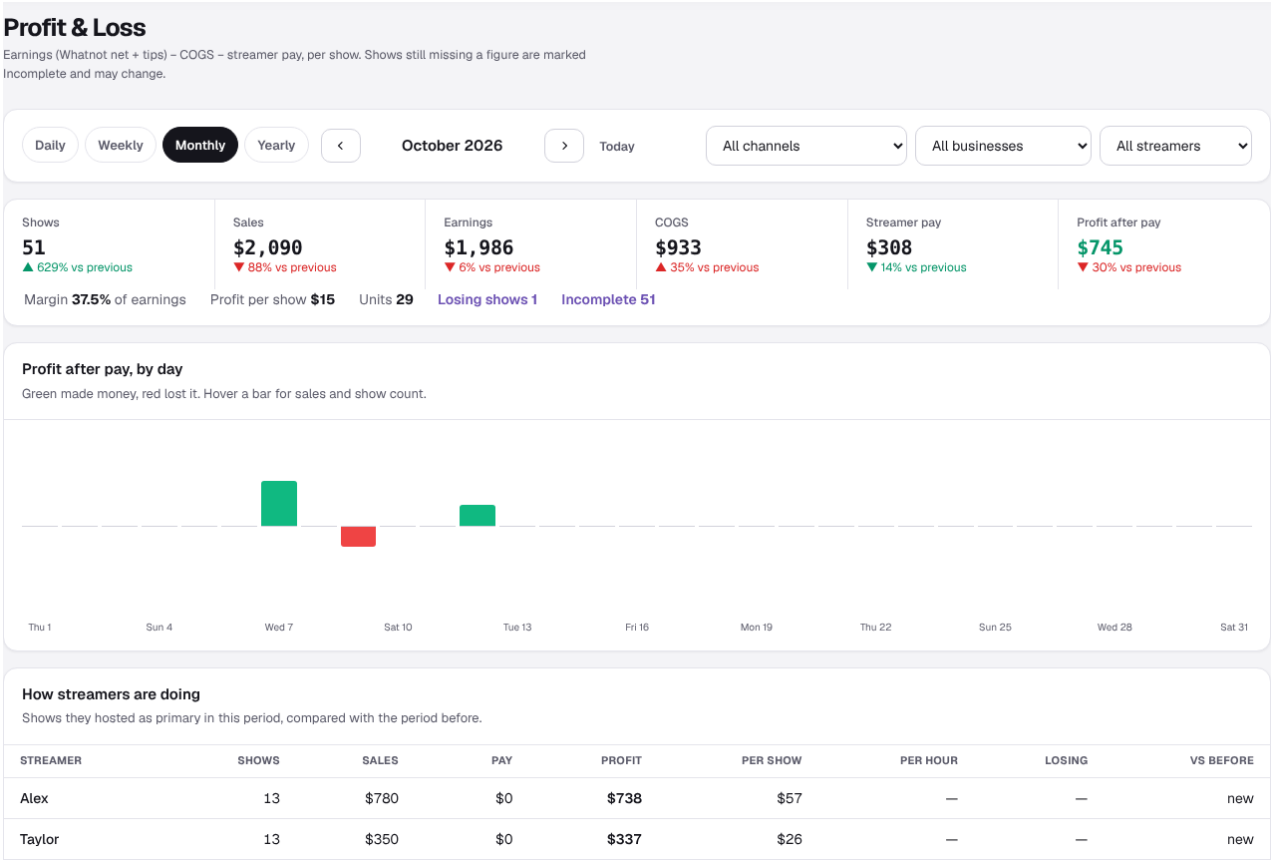

Edit team rates: Regular payouts or Sales split, the pay %, burdens and in-house hourly, with the formula below.

The team rates card shows the current numbers at a glance; Edit team rates opens them in a pop-up. Cancel leaves everything as it was; Save team rates applies to pay calculated from then on - recalculate a draft run to pick them up. Individual overrides (Edit on a person's row) open in the same kind of pop-up.

Profit & Loss

DIRECT LINK
vortexops.tech/admin/profit-loss

NAVIGATION
Reports → Profit & Loss

Profit & Loss: daily, weekly, monthly or yearly, by channel, business and streamer.

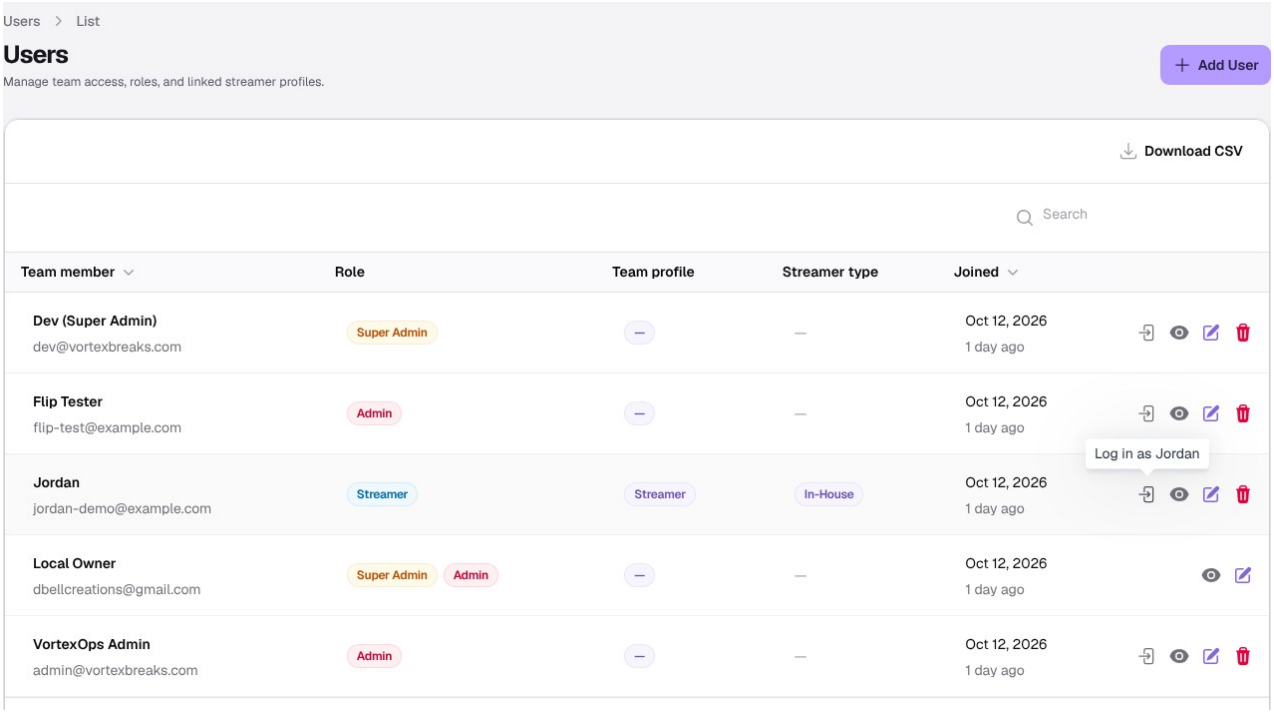

- **Earnings - COGS - Streamer pay** - = Profit after pay, compared with the period before.
- **Losing shows / Incomplete** - shows that lost money, and shows still missing a figure (their profit may change).
- **Summaries and alerts** - daily and weekly P&L summaries and a "show lost money" alert. Choose who gets them, in-app or by email, in Settings → Notifications.

19. Log In as a User

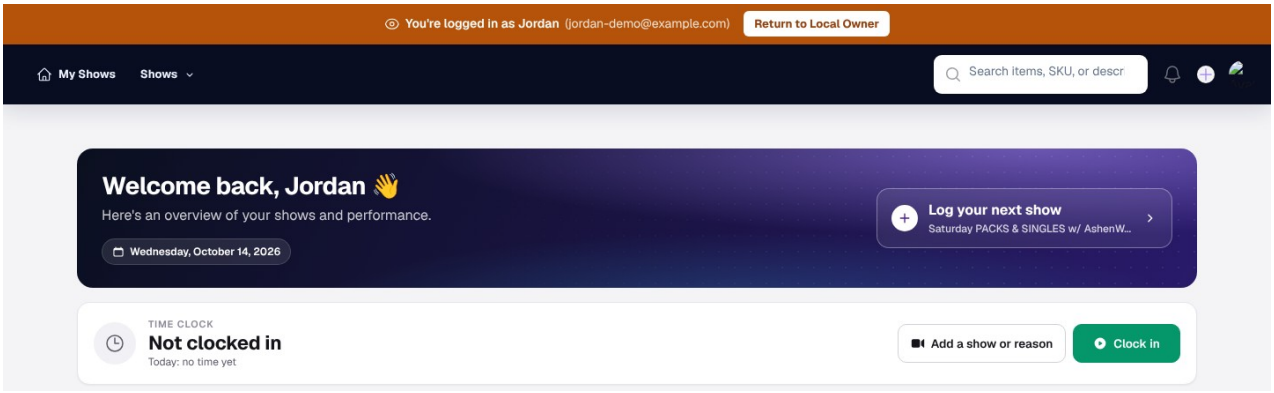

See exactly what someone sees, then come straight back. Owner only.

DIRECT LINK
vortexops.tech/admin/users

NAVIGATION
Admin → Users → Log in as

Users: the Log in as button (arrow into a door) on each row. It is also on a user's profile.

While logged in as someone, an orange banner names them on every page. Return to takes you back.

- Click Log in as on a row and confirm. You land on their home page as them.
- Click Return to <your name> on the banner to go back to your own account and the Users page.

YOU ACT AS THEM
Anything you do while logged in as someone is done as that user. Both switches are written to the activity log.
