VORTEX OPS

Admin Quick Guide

Users • Shows • Payroll • Payment Structures • Admin Workflows

PURPOSE

A practical reference for onboarding streamers, matching shows, resolving payroll blockers, reviewing weekly pay runs, and safely testing compensation changes.

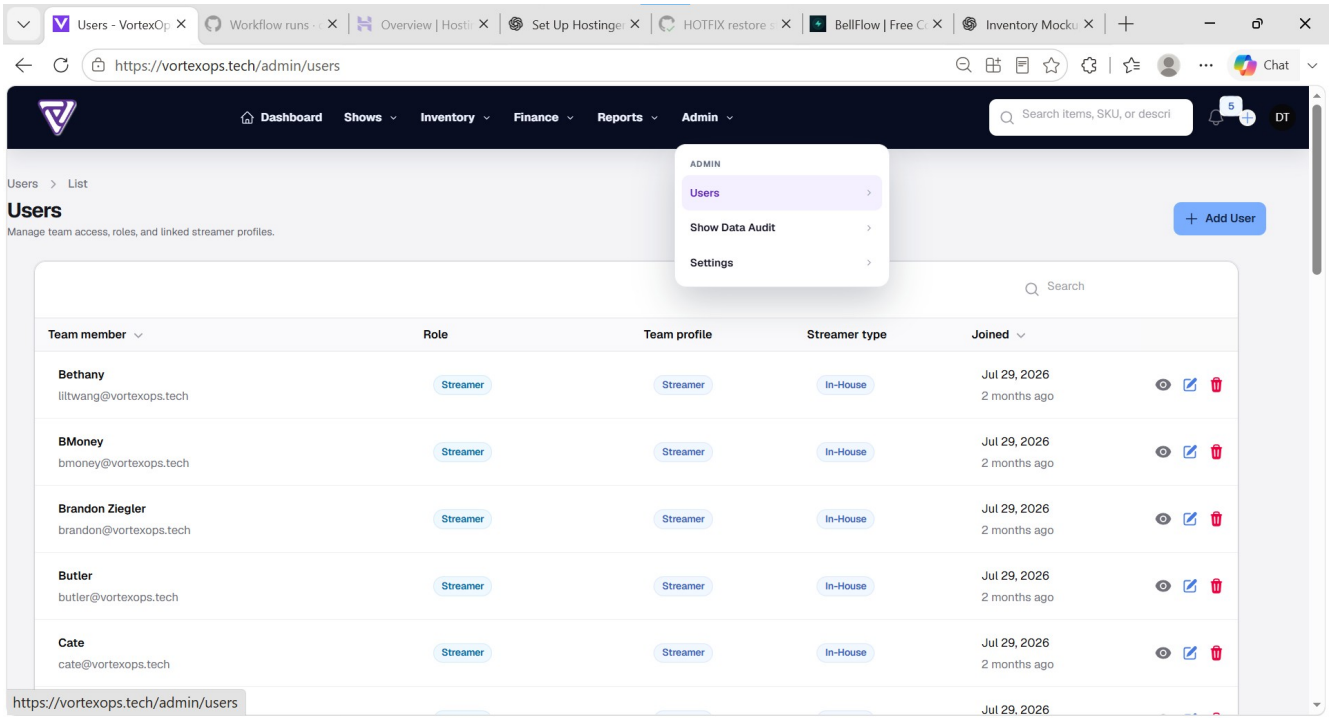

USERS	Identity, access, streamer type & aliases
SHOWS	Schedule, assignment & show follow-up
PAYROLL	Readiness, compensation, pay runs & history

1. Users

Create accounts, assign access, and maintain streamer matching information.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/users	**Admin → Users**

The Users page contains everyone who has access to Vortex Ops. Admins can create or edit accounts, assign roles, choose streamer type, and maintain aliases used for show matching.

Users: create an account or open an existing user to edit access and streamer settings.

Create or edit a user

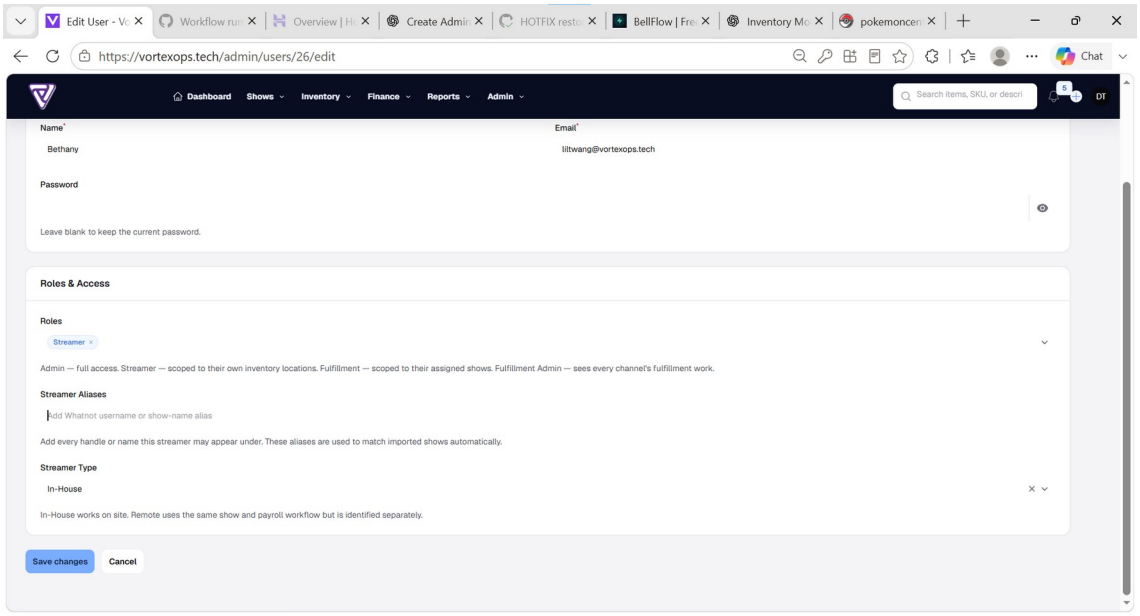

- Select + Add User to create a new account and enter the person's name, email, password, and role.
- Use Edit on an existing user to update access or streamer settings.
- When editing an existing user, leave Password blank to keep the current password.

Roles & access

- Admin - full administrative access.
- Streamer - streamer-facing access scoped to the appropriate workflow.
- Fulfillment - access for assigned fulfillment work.
- Fulfillment Admin - broader fulfillment access across channels/work.

2. Streamer Setup & Aliases

Finish the streamer profile so imported shows can match correctly.

User editor: choose streamer type and add the names or handles that identify this streamer.

Streamer type

Choose In-House or Remote. Both use the same general show and payroll workflow; the type identifies how the streamer works.

Streamer aliases

Add Whatnot usernames, show-name variations, or recurring title wording that identifies the streamer. Type an alias and use Add alias, Enter, or Tab, then save changes.

WHY ALIASES MATTER

If the same title or handle repeatedly appears in Unassigned Shows, add that wording to the user's aliases. This reduces repetitive manual matching.

New streamer setup checklist

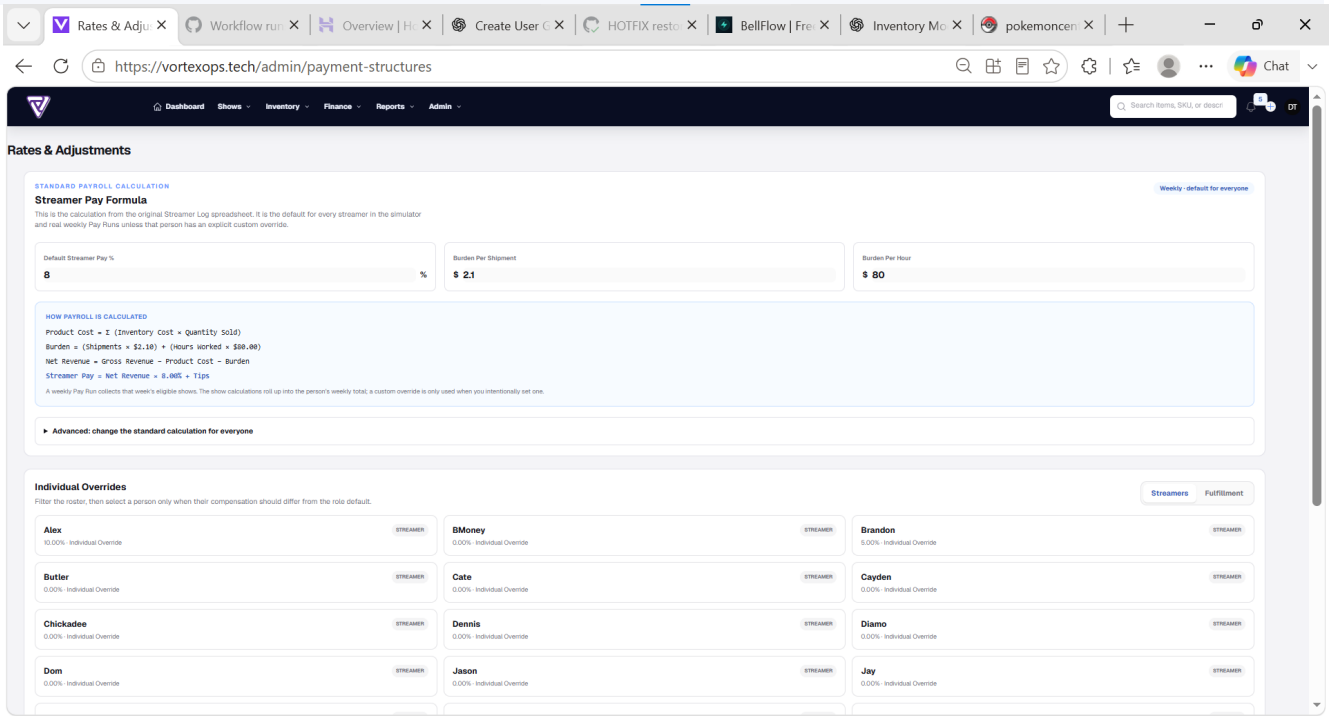

STEP	ACTION	WHAT TO DO
1	Create User	Admin → Users → + Add User
2	Assign Role	Choose Streamer and any other appropriate access.
3	Set Type	Choose In-House or Remote.
4	Add Aliases	Enter Whatnot usernames/show-name variations.
5	Check Pay	Confirm the standard rate or create an override.
6	Test Payroll	Use Payroll Simulator before real payroll.

3. Payment Structures

Configure the standard compensation formula and person-specific overrides.

DIRECT LINK
vortexops.tech/admin/payment-structures

NAVIGATION
Finance → Payment Structures

Rates & Adjustments: the standard formula is used unless an individual override is configured.

Standard streamer formula

SETTING	CURRENT EXAMPLE SHOWN
Default Streamer Pay	8%
Burden Per Shipment	$2.10
Burden Per Hour	$80.00

How payroll is calculated

- Product Cost = Inventory Cost × Quantity Sold
- Burden = (Shipments × $2.10) + (Hours Worked × $80.00)
- Net Revenue = Gross Revenue - Product Cost - Burden
- Streamer Pay = Net Revenue × Pay % + Tips

Individual overrides

- Use a different Streamer Pay % when one person has a different rate.
- Use a different calculation only when that streamer's compensation method differs.
- Override tip handling when tips should be treated differently.
- Reset to Role Default to remove the person's custom override.

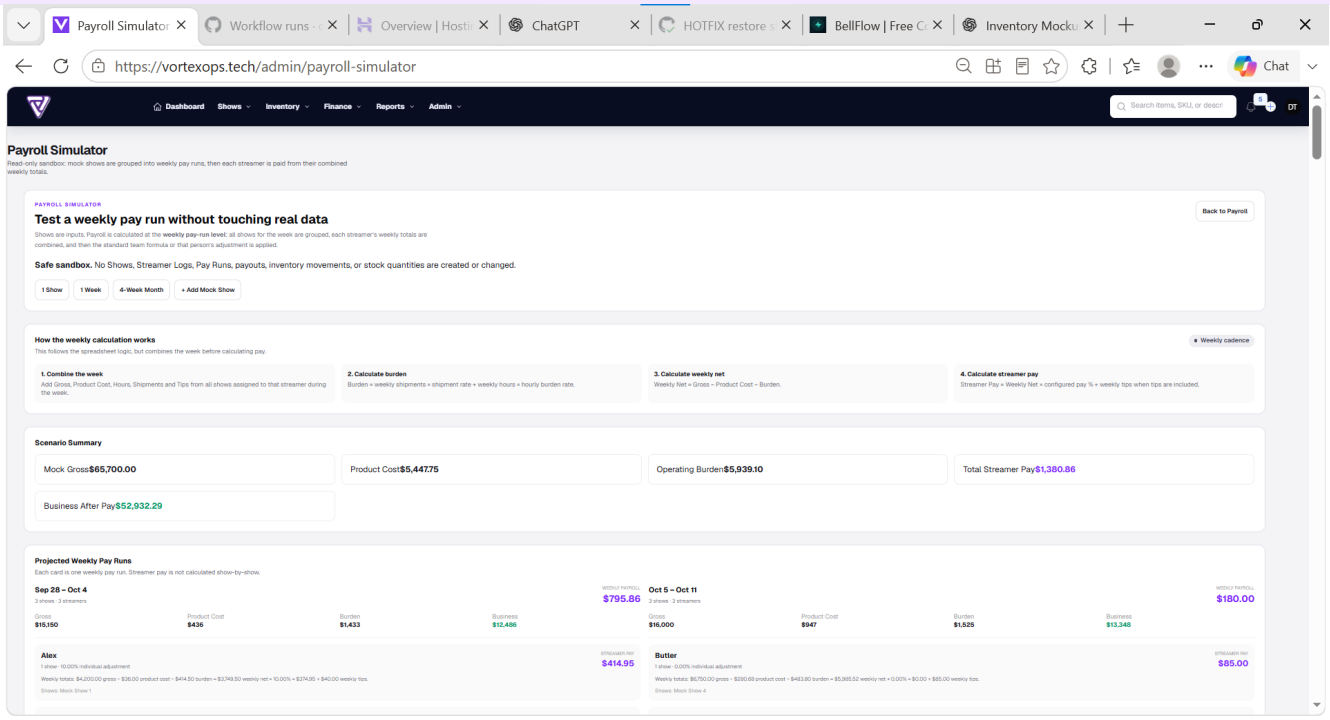

4. Payroll Simulator

Test compensation changes without touching real operational data.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payroll-simulator	**Finance → Payroll Simulator**

SAFE SANDBOX

The simulator does not create or change real shows, streamer logs, pay runs, payouts, inventory movements, or stock quantities.

Payroll Simulator: use quick scenarios, then review the modeled weekly results.

Quick scenarios

Use 1 Show, 1 Week, or 4-Week Month for a quick test. Use + Add Mock Show when you want to build a custom scenario.

Read the results

- Mock Gross - total simulated revenue.
- Product Cost - simulated cost of products used.
- Operating Burden - shipment and hourly burden.
- Total Streamer Pay - calculated streamer compensation.
- Business After Pay - modeled amount remaining after costs and streamer pay.

Mock show inputs

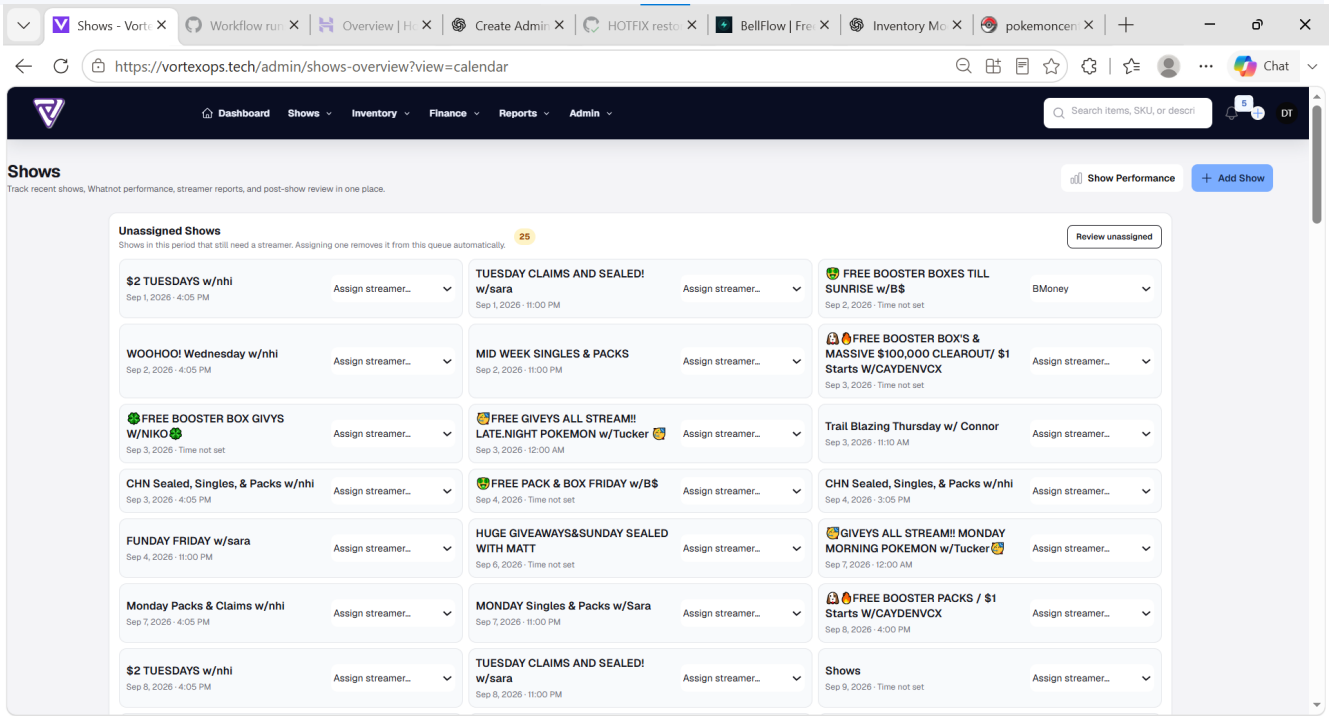

Open Mock Show Inputs only when you need to change the assumptions: show date, streamer, gross sales, hours, shipments, tips, products, and quantities.

5. Shows Overview

The main workspace for schedule visibility, streamer assignment, and show follow-up.

DIRECT LINK
vortexops.tech/admin/shows-overview

NAVIGATION
Shows → Shows Overview

Unassigned Shows: full titles are visible and admins can assign a streamer directly from the queue.

Unassigned Shows

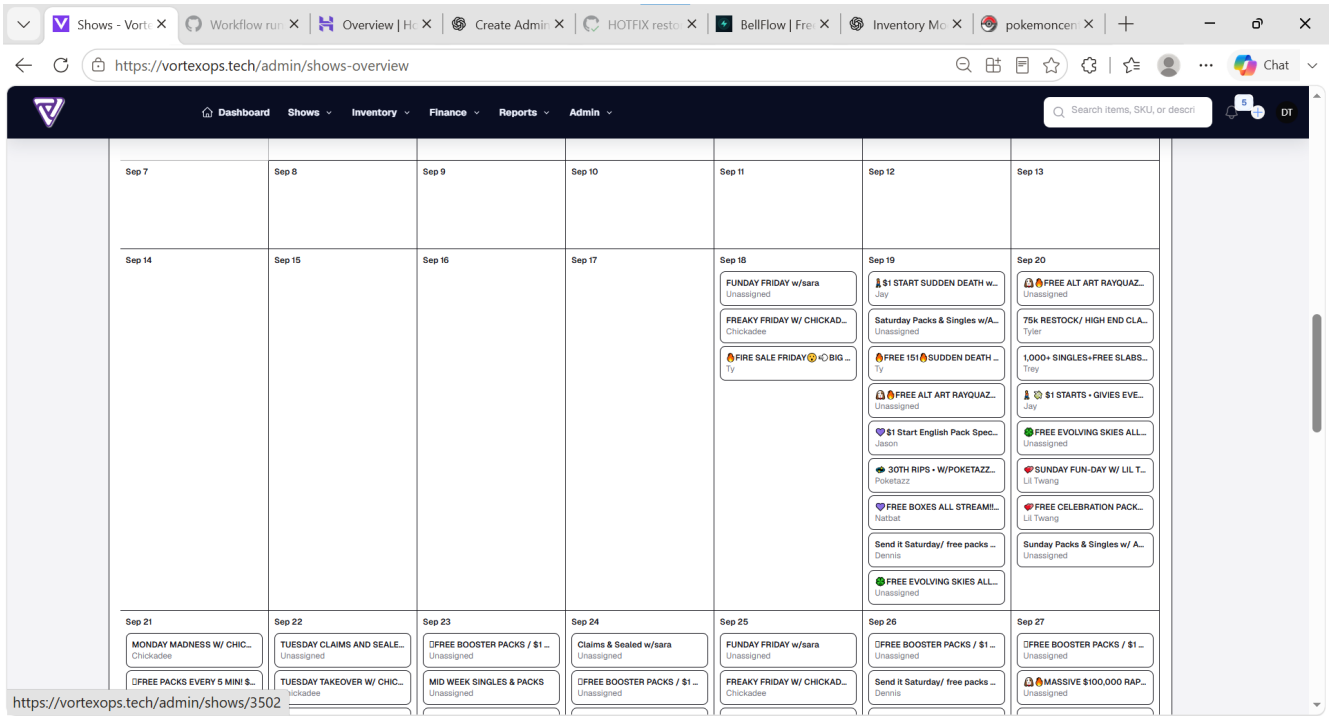

- Choose the correct streamer directly from the assignment control.
- The assignment saves immediately; once assigned, the show leaves the Unassigned Shows queue.
- If the same title or handle appears repeatedly, add it as a Streamer Alias under Admin → Users.
- Use Review unassigned when you want to focus only on unresolved show-to-streamer matching.

Calendar and Cards

Calendar is the default view and is best for schedule visibility. Switch to Cards when you want more operational detail such as streamer, workflow status, gross/net information, and show actions.

6. Working Shows by Date

Use the view that matches the task you are doing.

Calendar view: review the month visually and spot assigned or unassigned shows by date.

Calendar view - default

- Best for understanding the schedule at a glance.
- Use it to spot busy days, missing assignments, and where shows fall in the month.
- Open a show when you need more detail or follow-up.

Cards view

- Best for day-to-day operational cleanup.
- Shows are paginated instead of presented as one long table.
- Each card surfaces schedule, workflow, streamer, gross/net, and View/Edit actions.
- Admins can assign an unassigned show directly from the card.

MATCHING TIP

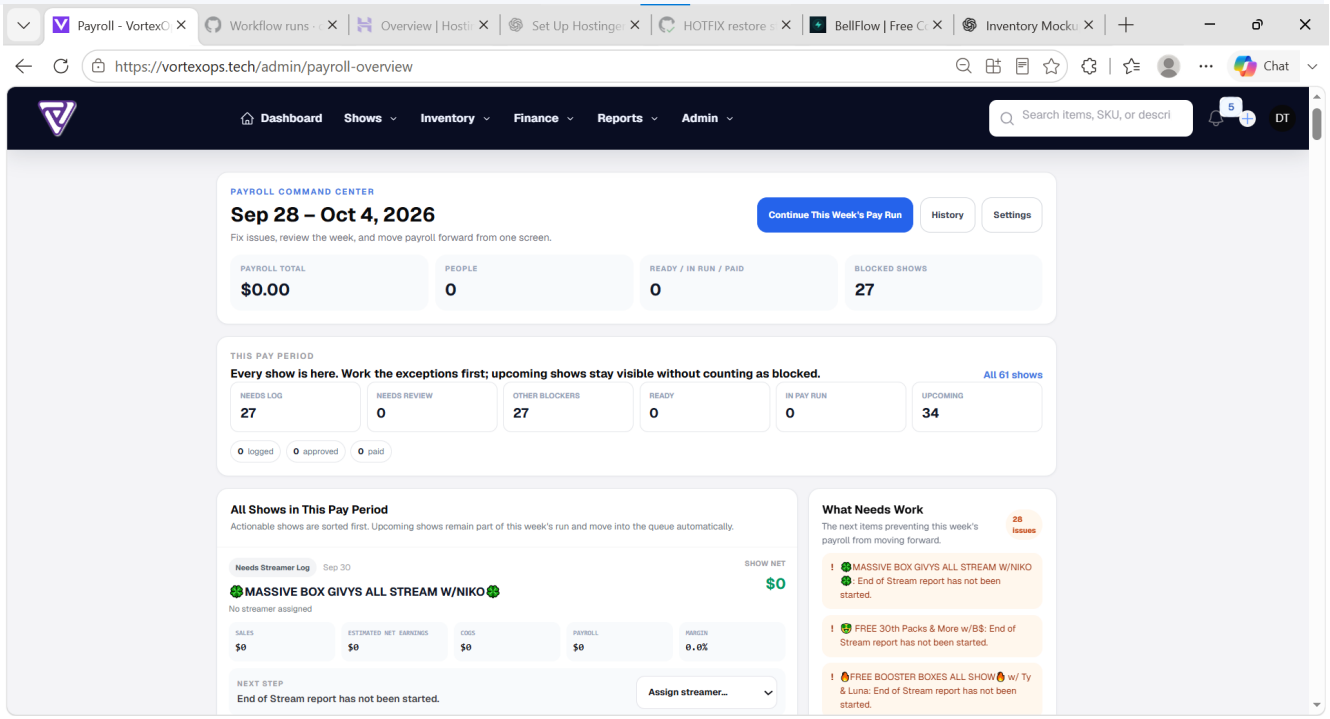

A good alias should be a recurring name, handle, or title pattern that clearly identifies one streamer. Avoid overly broad wording that could match multiple people.

7. Payroll Overview

The command center for the current weekly pay period.

DIRECT LINK
vortexops.tech/admin/payroll-overview

NAVIGATION
Finance → Payroll Overview

Payroll Overview: work exceptions first, then move completed shows toward the weekly pay run.

What to look at first

- Blocked Shows - shows that cannot move forward yet.
- Needs Log - completed shows still waiting for streamer/end-of-stream information.
- Needs Review - shows requiring administrative review.
- Ready - completed workflow and ready for payroll.
- In Pay Run - already included in the weekly pay run.
- Upcoming - scheduled shows remain visible but are not blockers yet.

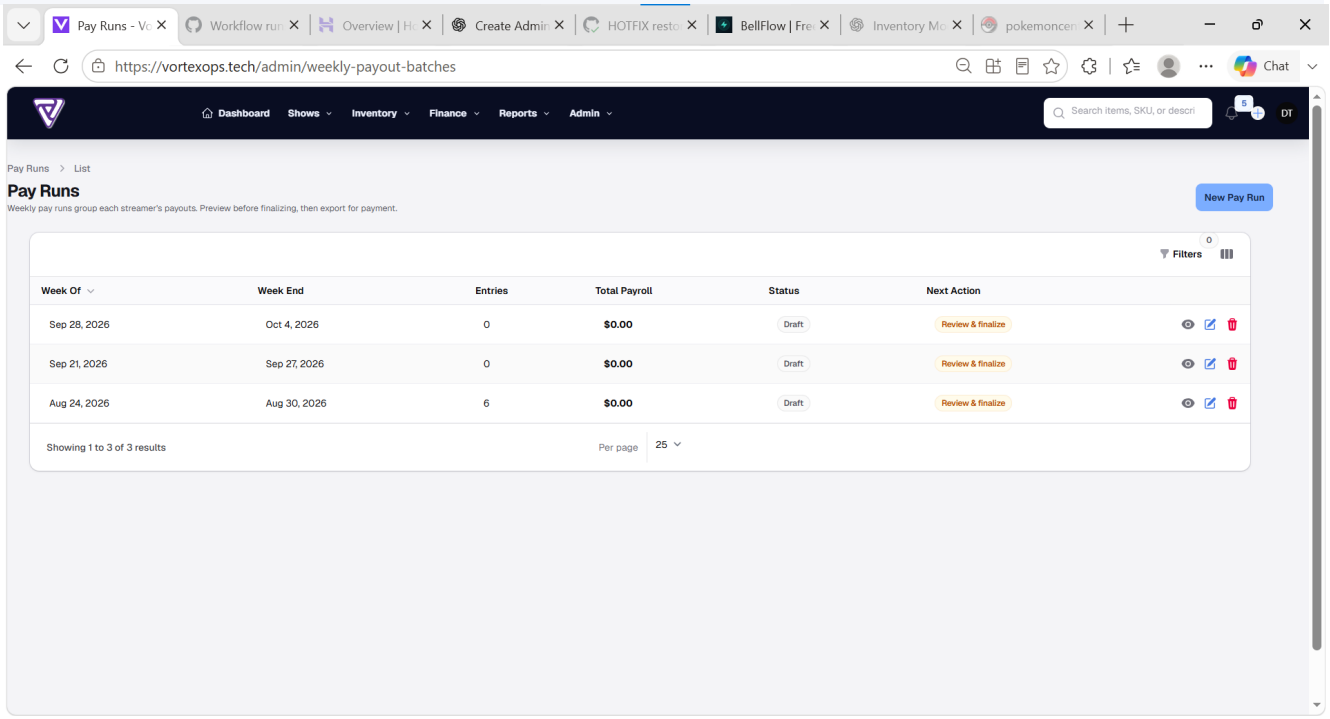

WORK THE EXCEPTIONS FIRST
Use the show cards and their next actions to clear missing logs, reviews, and assignments before finalizing the week's payroll.

8. Pay Runs & Pay Run History

Review current and previous weekly payroll batches.

DIRECT LINK
vortexops.tech/admin/weekly-payout-batches

NAVIGATION
Finance → Pay Run History

Pay Run History: weekly batches show entries, total payroll, status, and the next action.

Pay Run list

- Week Of / Week End - identifies the weekly payroll period.
- Entries - number of payout entries currently included.
- Total Payroll - total calculated payroll for the batch.
- Status - where the batch is in the payroll workflow.
- Next Action - the next step, such as Review & finalize.
- New Pay Run - creates a new weekly pay-run batch when needed.

Eligible shows are grouped into the weekly pay run. Admins review the batch, confirm entries and totals, then move it toward finalization/export for payment.

9. How the Payroll Pieces Fit Together

A simple end-to-end view of the admin workflow.

STEP	AREA	PURPOSE
1	Shows	Shows are imported/scheduled and assigned to the correct streamer.
2	Streamer workflow	Completed shows receive required streamer/end-of-stream information.
3	Payroll Overview	Admins resolve missing logs, reviews, assignments, and other blockers.
4	Payment Structures	The standard formula or individual override determines compensation.
5	Pay Run	Eligible shows are grouped into the weekly pay run.
6	Review & finalize	The weekly batch is reviewed before export/payment.
7	History	Past pay runs remain available for reference.

CURRENT WORKING FLOW

Assign the show → complete/review show data → clear payroll blockers → calculate with the configured payment structure → include in the weekly pay run → review and finalize.

Day-to-day admin workflow

- Check Shows Overview for unassigned shows and assign them to the correct streamer.
- Add aliases when a recurring title or handle should auto-match in the future.
- Use Calendar for schedule visibility and Cards for operational cleanup.
- Check Payroll Overview for Needs Log, Needs Review, and other blockers.
- Resolve completed-show exceptions before finalizing the week's payroll.
- Review the weekly Pay Run, confirm entries/totals, then finalize/export when ready.
- Use Payroll Simulator whenever you want to test a compensation change without touching real data.

10. What Do I Do When...?

Quick reference for the most common admin situations.

SITUATION	GO HERE	ACTION
A show has no streamer	**Shows Overview**	Assign the correct streamer.
The same streamer keeps appearing unassigned	**Admin → Users**	Add a recurring title/handle as an alias.
A completed show has no streamer log	**Payroll Overview**	Work the Needs Log item.
A show needs admin approval	**Payroll Overview**	Work the Needs Review item.
A streamer has a different pay rate	**Payment Structures**	Create an Individual Override.
You want to test a pay change	**Payroll Simulator**	Run a mock scenario.
The week is ready for payroll	**Payroll Overview**	Confirm readiness and move into the pay run.
You need an old payroll	**Pay Run History**	Open the weekly batch.

SIMPLE RULE
Users = identity & access • Shows = schedule & assignment • Payment Structures = compensation • Payroll Overview = readiness • Pay Runs = weekly payment workflow • Simulator = safe testing

Note: the Shows workflow is still being refined, so screenshots and labels can be updated as the product evolves.

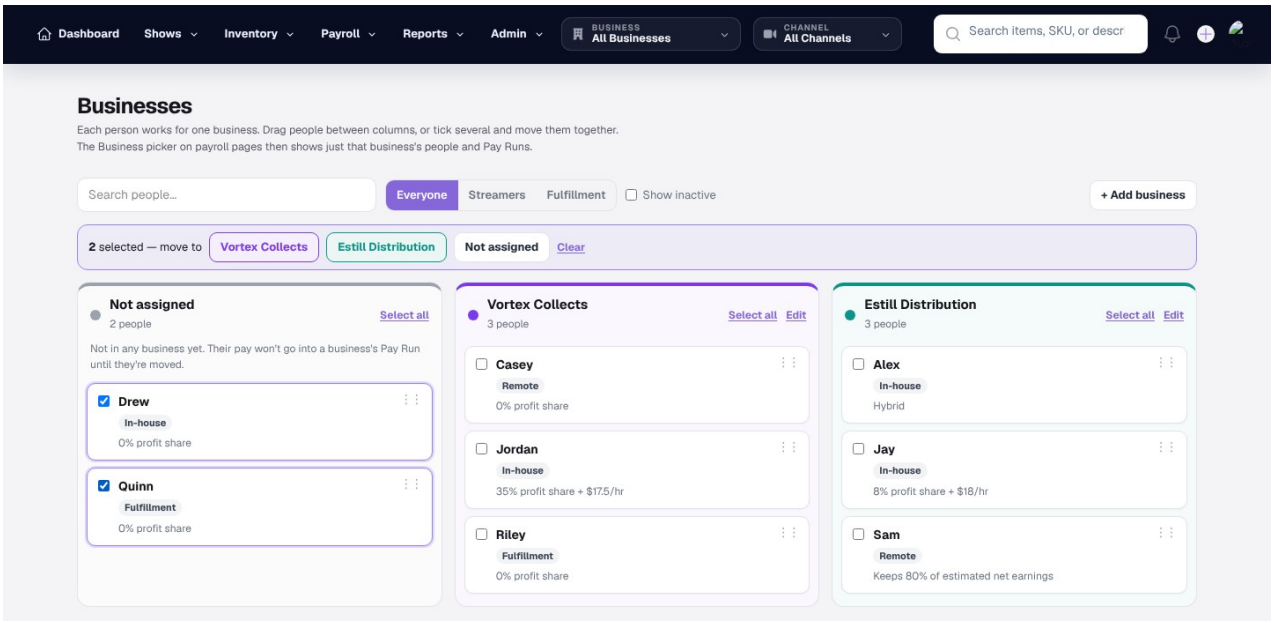

11. Businesses

Vortex Collects and Estill Distribution: who works for which business, and paying each one separately.

DIRECT LINK
vortexops.tech/admin/businesses

NAVIGATION
Payroll → Businesses

Both businesses stream on the same Whatnot channels, but every person works for one of them. Put each person in their business once; from then on their shows, pay rates and weekly Pay Runs belong to that business. Fulfillment admins find this page under Admin → Businesses.

Businesses: a column per business, plus Not assigned. Drag a card, or tick several and use Move to.

Assign people

- **Drag a card** - onto a business column to move that person.
- **Tick several people** - then click a business in the bar above the board - or drag one of the ticked cards and they all move together.
- **Select all** - ticks everyone in a column.
- **Not assigned** - people not in a business yet. Their pay stays out of the business Pay Runs until they are moved.
- **Add business / Edit** - create another business, or rename and recolour one.

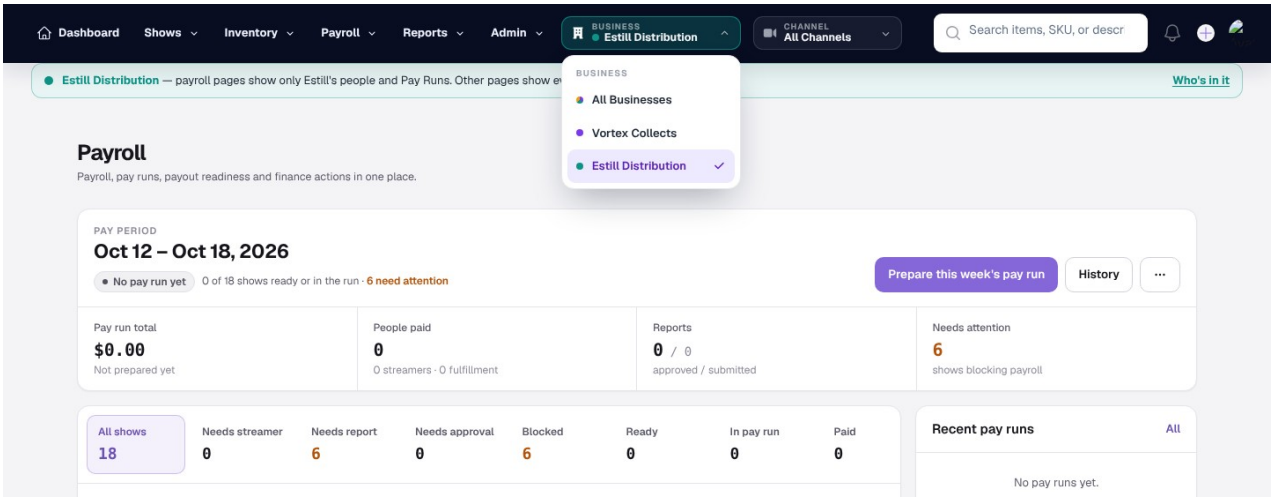

BEFORE ANYONE IS ASSIGNED
Until at least one person is in a business, payroll works exactly as before: one Pay Run per week for everyone.

12. Running Payroll per Business

Pick the business at the top of any payroll page; each business has its own Pay Runs.

DIRECT LINK
vortexops.tech/admin/payroll-overview

NAVIGATION
Payroll → Payroll Overview

The Business picker sits beside the Channel picker on payroll pages. A coloured banner names the business you are viewing.

The Business picker

- Shown only on payroll pages: Payroll Overview, Pay Run History, Payouts, Payment Structures and Businesses.
- Choose a business to see only its people, shows and Pay Runs. Choose All Businesses to see both together.
- The dashboard, shows, reports and inventory always show every business - the picker never filters them.

Separate Pay Runs

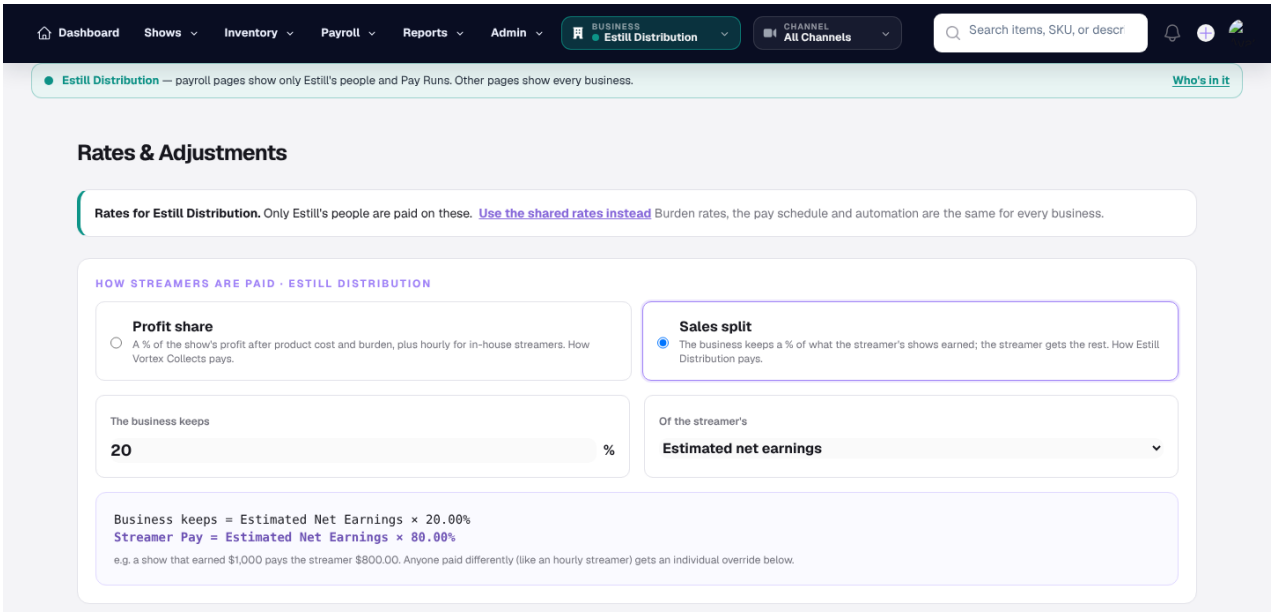

- Each business gets its own weekly Pay Run, so one business can be finalized, submitted and marked paid without touching the other's people.
- **Prepare this week's pay run** - creates the chosen business's run, or one run per business when All Businesses is chosen.
- **Split by business** - on a draft Pay Run made for everyone before businesses were set up - turns it into one run per business.

NOBODY IS PAID TWICE
A run for all businesses and a run for one business cannot cover the same week. If the week already has an all-business draft, split it first.

13. Pay Rates per Business

Vortex Collects pays profit share; Estill Distribution pays a sales split.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payment-structures	**Payroll → Payment Structures**

Payment Structures with Estill Distribution picked: the business keeps 20% of each show's estimated net earnings.

How each business pays

PAY TYPE	HOW IT WORKS
Profit share (Vortex Collects)	Streamer Pay % of the show's profit after product cost and burden, plus hourly for in-house streamers.
Sales split (Estill Distribution)	The business keeps a % of what the streamer's shows earned; the streamer gets the rest.

Set Estill's rates

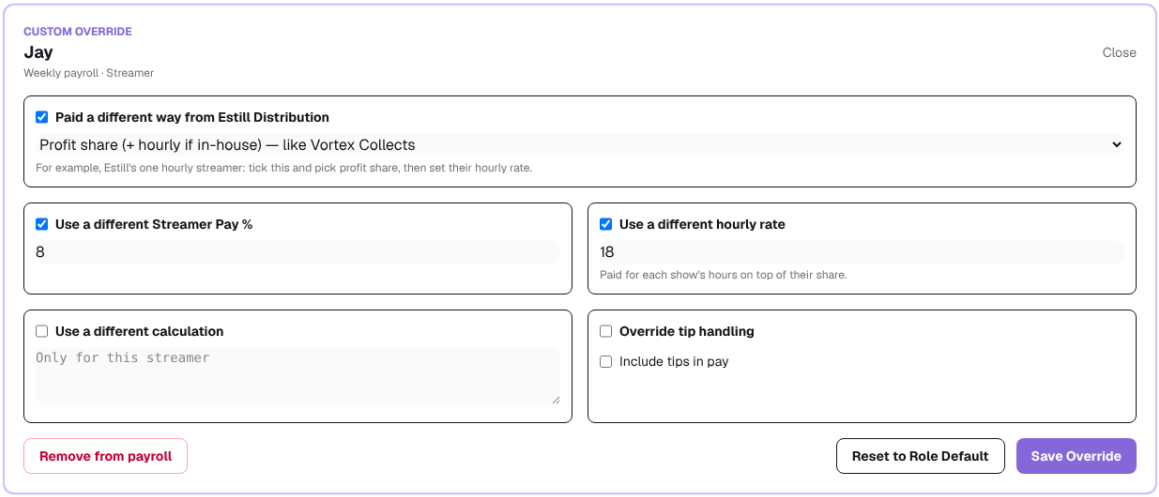

- Pick Estill Distribution in the Business picker, then open Payment Structures.
- Choose Sales split and enter the % the business keeps.
- **Of the streamer's** - Estimated net earnings (after Whatnot fees, the default) or Gross sales.
- Save. Example: a show that earned $1,000 with a 20% cut pays the streamer $800.

With All Businesses picked, the page edits the shared rates, which any business uses until it saves its own. Use the shared rates instead drops a business's own rates. Burden rates, the pay schedule and automation are shared by both businesses.

14. Paying One Person Differently

Estill's hourly streamer is paid like a Vortex Collects streamer.

DIRECT LINK	NAVIGATION
vortexops.tech/admin/payment-structures	**Payroll → Payment Structures → Individual Overrides**

Individual override: tick Paid a different way, choose Profit share, then set the % and hourly rate.

Set up the hourly Estill streamer

- With Estill Distribution picked, click the streamer's card under Individual Overrides.
- Tick Paid a different way from Estill Distribution and choose Profit share.
- Tick and fill in their Streamer Pay % and hourly rate, then Save Override.
- **Reset to Role Default** - removes the override, so they follow Estill's sales split again.

A person's business and pay can also be set on their user profile (Admin → Users → Edit → Pay). Moving someone to another business changes how they are paid automatically unless they have their own pay type set.

What do I do when...?

SITUATION	GO HERE	ACTION
Someone's pay is missing from the business Pay Runs	Payroll → Businesses	Move them into their business, then recalculate the Pay Run.
Payroll only shows one business	Business picker	Choose All Businesses.
A business Pay Run overlaps another run	Pay Run History	Open the all-business draft and use Split by business.
An Estill streamer is still paid profit share	Businesses / Payment Structures	Check they are in Estill, Estill is set to Sales split, and they have no pay-type override.
