

VORTEX OPS

Streamer Show Reporting Guide

A simple walkthrough for logging inventory used during a Whatnot show, adding notes, and submitting your report.

Start here: <https://vortexops.tech> • Sign in with your streamer account.

1 Find the show you need to log

After signing in, you will land on My Shows. The Waiting on you tab shows reports that still need your attention. Find the correct show by its title and date, then click Add items. If you already started, choose Finish report.

My Shows: choose a show from the cards or use the status filters.

- Waiting on you = action required; Upcoming = future shows; Submitted = sent for review; Approved = completed.
- Use Calendar to see your shows by date instead of as cards.
- Log next show is a shortcut to the next report needing attention.

2 Add the inventory used in the show

In the Items step, select Add items to open the inventory picker. Search by product name, SKU, or barcode, or narrow results by category. Select Add on a product and adjust the quantity with the minus and plus controls. You can select multiple products before clicking Add to report.

Inventory picker: search, select items, and set quantities.

Selected items show a quantity control and the Add to report button.

For each item in your report, choose the correct usage type (Sold, Giveaway, Promo, or Other). Make sure the quantity and classification are correct. Whatnot figures are provided for reference; you do not need to match each Whatnot order one by one.

3 Enter time, fulfillment details, and notes

Move to Time & notes after logging items. Show details may populate automatically from Whatnot. Check the Hours streamed field and enter or correct the duration if it is missing or inaccurate. Review any other available fields rather than assuming imported values are complete.

Show Report: \$100,000+ Inventory Claims w/ BRANDON 🍌

Choose what was used during this show. Items can come directly from Main Warehouse inventory.

WED, OCT 7, 2026 - VORTEX BREAKS

\$100,000+ Inventory Claims w/ BRANDON 🍌

✓ Saved 0 seconds ago [Change show](#)

Sales	Earnings	Buyers	Giveaways	Shipments
\$5,389.00	\$4,752.21	22	35	0

ⓘ Whatnot numbers are for reference. Items you log don't have to match Whatnot orders one-for-one.

1 Items

2 Time & notes

3 Review

Time & Shipments

Filled in from the show. Change either one if it's wrong — your pay is worked out from what's here.

Hours streamed

Show length on Whatnot: not recorded yet

Shipments

Counted from this show's shipments: 0

Show notes (optional)

Anything operations should know. Saves as you type.

Report summary

Sold	1
Giveaways	0
Promo	0
Other	0
Total units	1

Everything is ready.

Time & notes: review imported information and fill in missing details.

- Use Show notes to explain inventory issues, unusual giveaways, missing products, or anything operations should know.
- If a show will require extra fulfillment time or special handling, mark the applicable fulfillment flag in the report, where available, and describe why in the notes.
- Your draft saves as you work; confirm the saved indicator before leaving.

4 Review and submit the report

Select Review report, verify items, quantities, usage types, streamed hours, and notes, then submit the report. Once submitted, the report is locked to protect the approved workflow. You cannot directly edit it afterward.

Important: Double-check everything before submitting, especially sold versus giveaway counts and any fulfillment notes.

5 Need to correct a submitted report?

Open the submitted or approved report and select Need to change something? This sends a request to an admin. Your report remains locked until an admin reopens it; sending a request does not immediately unlock editing.

A completed report can be opened with View report.

After requesting changes, the status reflects the request and an admin is notified.

6 Optional: use Calendar view

The Calendar button on My Shows opens a date-based view of your shows. Use it to locate a show by day, then open that show to complete its report. Calendar is a viewing/navigation option, not a separate reporting workflow.

Calendar view: find your shows by date.

Before you submit — quick checklist

- ☐ Correct show and date
- ☐ All inventory used has been added
- ☐ Quantities and usage types are accurate
- ☐ Streaming hours are correct
- ☐ Fulfillment concerns and show notes are included
- ☐ Report reviewed before final submission

Questions or corrections after submitting? Use the request-changes option and contact your Vortex Ops admin if needed.
